

Corvus Energy marine battery energy storage system solutions for passenger ferries: The Corvus Orca energy storage system is widely used for electric and ...

While these ferries usually have a shorter range than their combustion engine counterparts, advancements in battery storage are steadily expanding their horizons. Small (albeit slow-going) electric ferries, often seen ...

Danfoss Power Solutions has informed ship.energy that its Editron division is partnering with Estonia's Baltic Workboats to supply the electric propulsion system for a new hybrid passenger ferry that will be delivered in ...

Norwegian ferry company Norled AS, shipyard Fjellstrand and Siemens AS have jointly developed the world's first fully electric battery powered passenger and car ferry.

The Shinas achieved a record speed of 55.9kt on sea trials in Australia, making it the fastest diesel-powered passenger ferry currently in commercial service (cruising speed is 52kt). Interceptors (Austal SeaState ...

The Rapid Electric Emission Free (REEF) Ferry Program will involve multiple phases. The first phase includes the deployment of three 150-passenger battery electric ferries to operate on a network connecting emerging waterfront neighbourhoods in San Francisco, and two 400-passenger battery electric ferries serving current SF Bay Ferry routes in Oakland and ...

Caption: The world's first all-electric ferry MF Ampere has now sailed for 10 years on clean energy, saving one million litres of diesel and 2,700 tons of CO2 every year. Caption: The Corvus Energy first-generation marine ...

A solar-electric passenger ferry that will travel between the mainland town of Kamp and the island of Usedom in Northern Germany will be the first vessel to use a new fully electric thruster system from Poseidon ...

Oman Passenger Ferries Market is expected to grow during 2023-2029 Oman Passenger Ferries Market (2024-2030) | Analysis, Outlook, Companies, Share, Size & Revenue, Industry, Growth, Competitive Landscape, Forecast, Segmentation, Value, Trends

The TxDOT's Esperanza "Hope" Andrade ferry, equipped with Siemens Energy's BlueDrive PlusC power and propulsion system, improves travel for Galveston and Bolivar Peninsula visitors with ...

Caption: The world's first all-electric ferry MF Ampere has now sailed for 10 years on clean energy, saving one million litres of diesel and 5,700 tons of CO2 every year. Caption: ...

Emergency back-up power storage for ships, offshore structures & marine craft. Batteries for electric ships or ships with electrical propulsion. Battery packs for river boats & passenger ferries. Energy storage for offshore ...

Vessel Types Supported: Car and passenger ferries; Other marine vessels requiring high-power charging solutions Ready to electrify your fleet? Call us at 1-833-976-9376 or Contact ...

They are energy storage systems but with high fire risk, which can negatively affect their applicability. Regarding the battery systems" applications on ships, Wang et al. [ 14 ] presented a life cycle analysis, with a focus on ...

To power the 147-passenger vessel, they sought a battery-free energy storage solution that could be housed compactly in the hull of the vessel. Nidec Conversion was selected to supply the innovative electric propulsion system for what would become the first electric ...

Zero Emission Ferry and Onshore Battery Energy Storage System Amherst Islander II & Wolfe Islander IV. The Challenges The Solution The solution was the development of a first-of-its ... Passenger ferries, which travel relatively short distances, are ideal for fully electric operation. To meet tight travel timetables, ferries are docked for only ...

News Release. Stena Line and Callenberg select Corvus Energy for Battery-Powered Ferry. 1 MWh Corvus energy storage enables emissions-free berthing of Stena Jutlandica--a first for a Swedish-operated ferry . Richmond, ...

Energy storage was designed for ferry operating in over 80 km route in this study. The operation was inspected in two scenarios where in first the energy was used to feed the propulsion to ...

Battery storage maker Corvus Energy is to supply an energy storage system (ESS) to Spanish shipyard LaNaval for the production of a hybrid compressed natural gas (CNG) ferry. The ESS comprises 48V lithium-ion battery modules with 1.6MWh capacity. The ESS will be used for backup power and aims to increase the energy efficiency of the ferry.

The MS Medstraum, operated by Kolombus, which administers public transport for Rogaland, a country in western Norway, is the world"s first high-speed electric ferry operating at 23 knots (42.6km per hour) for a full hour ...

Damen Shipyards Group, which has built two electric ferries for the Ontario Ministry of Transportation, has selected energy storage firm Leclanch&#233; to construct a pair of fast-charge eFerry stations on Canada"s Lake Ontario. ...

"Ampere" is the world's first electrical car and passenger ferry powered by batteries - operated by Norwegian ship owner Norled. Built in conjunction with shipbuilder Fjellstrand, Siemens Energy installed the ...

Shift Clean Energy (Shift) and Garden Reach Shipbuilders and Engineers (GRSE) have formed a partnership that will result in Shift powering the shipyard's first all-electric ferry. The zero-emission vessel - designed by ...

This innovative venture is part of Project Green Iron, a pilot scheme that aims to utilize green energy from an Energia Group wind farm in County Antrim to operate the Artemis EF-24 Passenger ferry's Belfast to ...

One standout project is the Texas Department of Transportation (TxDOT) ferry initiative, where Siemens Energy played a critical role in developing a hybrid design. By ...

Key agreements are set to be signed soon, paving the way for the establishment of the first commercial-scale energy storage project in the Sultanate of Oman. The agreements ...

MF AMPERE-the world's first all-electric car ferry [50]. The ship's delivery was in October 2014, and it entered service in May 2015. The ferry operates at a 5.7 km distance in the Sognefjord.

The Challenges The Solution The solution was the development of a first-of-its-kind, combined onboard and onshore energy storage solution enabling hybrid and fully electric vessels to recharge quickly when returning to port. The electrification of transportation is expanding at a fast pace and that includes the maritime sector where a growing list

Marine news covering shipyards, naval architects, vessel design and construction, shipping trends, cruising, and ferries in the U.S. and international maritime industry. [Subscribe Menu](#)

Electric and Hybrid Passenger Ferries Passenger ferry operators around the world are upgrading their fleets to include more all-electric and hybrid ferries. Corvus Energy is the leading provider of marine battery energy storage ...

The electrification of vessels/ferries for green transformation requires onboard electrical energy storage as well as an energy supply network in the port area. In this context, a lot of efforts have been made in the last ...

F.G. Aarskog et al. / Energy and cost analysis of hydrogen driven passenger ferry 107 750 kW, ca. 4000 litres fuel storage, exhaust systems, gear boxes, cooling systems, and other auxiliary ...
