

# New eu requirements for energy storage exports

How much energy storage will Europe have in 2022?

Many European energy-storage markets are growing strongly, with 2.8 GW (3.3 GWh) of utility-scale energy storage newly deployed in 2022, giving an estimated total of more than 9 GWh. Looking forward, the International Energy Agency (IEA) expects global installed storage capacity to expand by 56% in the next 5 years to reach over 270 GW by 2026.

How much energy storage capacity does the EU need?

These studies point to more than 200 GW and 600 GW of energy storage capacity by 2030 and 2050 respectively (from roughly 60 GW in 2022, mainly in the form of pumped hydro storage). The EU needs a strong, sustainable, and resilient industrial value chain for energy-storage technologies.

How big will energy storage be in the EU in 2026?

Looking forward, the International Energy Agency (IEA) expects global installed storage capacity to expand by 56% in the next 5 years to reach over 270 GW by 2026. Different studies have analysed the likely future paths for the deployment of energy storage in the EU.

How will new EU gas storage legislation affect Europe's gas supply?

New storage legislation adopted today will strengthen the EU's security of gas supply in view of the upcoming and next winters. Faced with the threat of supply disruptions by Russia, the EU Gas Storage Regulation requires that Europe's gas reserves are refilled before the winter, and their management protected from outside interference.

What will the European Commission do about gas storage?

The Commission will also continue monitoring the security of gas supply of the EU with EU countries in the Gas Coordination Group, and coordinate any potential measures taken to ensure optimal storage refilling. The European Commission proposed today to prolong the current Gas Storage Regulation until the end of 2027.

What does the European Commission say about energy storage?

The Commission adopted in March 2023 a list of recommendations to ensure greater deployment of energy storage, accompanied by a staff working document, providing an outlook of the EU's current regulatory, market, and financing framework for storage and identifies barriers, opportunities and best practices for its development and deployment.

EU Legislation in Progress EPRS | European Parliamentary Research Service Author: Alex Wilson Members' Research Service PE 729.393 - June 2022 EN New EU regulation on gas storage . OVERVIEW . The Russian invasion of Ukraine in February 2022 has triggered serious concerns about EU energy security.
