

NY Green Bank seeks transactions that contribute to forward progression of clean energy financing markets. NY Green Bank will partner with energy service companies, regional banks, larger multinational banks, and other investors and lenders to support economically viable clean energy projects.

Building a clean, resilient, reliable, and affordable energy system for all New Yorkers. The Public Service Commission (PSC), supported by the Department of Public Service, seeks to stimulate effective competitive Clean ...

New York has become one of the most dynamic energy markets in the United States, with tremendous opportunities in the planning, developing, financing, and construction of utility-scale onshore and offshore generation, energy storage projects, community and C& I distributed energy resources, new transmission assets, clean energy manufacturing ...

New York State Energy Research and Development Authority President and CEO Doreen M. Harris said, "Governor Hochul has remained resolute in her commitment to New York's clean energy transition and this significant climate investment demonstrates how she continues to put New Yorkers first to ensure that we all benefit from a more sustainable ...

Clean Energy Industry Report is the latest in a multi-year, longitudinal research study that analyzes data on clean energy jobs, employer needs, and existing assets in New York's clean energy sector.

Battery energy storage systems are regulated at the federal, state, and local levels to mitigate risk and uphold safety measures. New York's Inter-Agency Fire Safety Working Group conducted extensive analysis following battery system ...

It is central to New York's clean energy transition. Our work is about immediacy and impact and is focused on transforming the market and helping New York State achieve its climate goals. ...

Edison, NJ, Feb. 4, 2025 - CS Energy and Calibrant Energy announce the completion of a portfolio of three stand-alone Battery Energy Storage Systems (BESS) in Westchester County, ...

Projects Will Provide More than 2.3 Gigawatts of Clean Energy December 3, 2024 . Governor Kathy Hochul today announced that contracts have been executed for 23 large-scale land-based renewable energy projects that will provide more than 2.3 gigawatts of clean energy, which is enough to power more than 700,000 homes throughout New York State.

New york clean energy and energy storage

Innovative installations in Westchester County will provide critical grid support during peak demand. Edison, NJ, Feb. 4, 2025 - CS Energy and Calibrant Energy announce the completion of a portfolio of three stand-alone Battery Energy Storage Systems (BESS) in Westchester County, New York. Strategically located in the towns of Hawthorne, Yorktown, ...

In 2019, 174 Power Global acquired a New York based solar and storage company, now 174 Power Global NE, creating over 25 megawatts of renewable energy for commercial ...

Clean energy jobs in New York State grew by 8.4% from 2020 to 2022, outpacing economy-wide employment growth (2023 clean energy job numbers are not yet available) [1]. Moving forward, more clean energy workers are needed to ...

Hempstead Town has prioritized renewable energy and sustainability initiatives and has demonstrated this commitment through action by completing a number of progressive clean energy projects that utilize solar, wind, geothermal, hydrogen, battery storage, electric vehicles, energy efficiency, and more.

New York is a leader in the clean energy transition with some of the most ambitious renewable targets in the nation to reach 70% renewables by 2030. With more than two decades of experience working in the state, we ...

New York's clean energy goals are some of the most ambitious in the country, with the State mandating 70 percent renewable energy on the grid by 2030 and 100 percent carbon-free electricity by 2040. The challenge for New ...

The awarded projects join the New York State Energy and Research Development Authority's (NYSERDA) growing portfolio of more than 200 innovation projects that are advancing new technologies in the sectors of long duration energy storage, clean hydrogen production and storage, grid modernization, geothermal, and building electrification and ...

We continue to make progress on connecting new renewable resources to the grid. In January of 2023, 27 new wind, solar, energy storage, and transmission expansion projects totaling 7,452 megawatts completed the final ...

New York State is committed to a cleaner, greener energy future--leading the U.S. in wind- and clean-technology patents, renewable energy resources, the development of new energy storage products and systems, ...

A planned transmission line for "clean energy" development has been terminated by the state of New York and its developers--a line planned to come online in 2027. The Clean Path project is a 175-mile transmission line ...

New york clean energy and energy storage

Since ESS can store clean energy like solar, wind, and hydro power, they are essential to creating a cleaner, more efficient, and resilient energy grid. ESS can also reduce ...

The energy storage system will supply the New York wholesale energy and ancillary service markets and will contribute to more economical and reliable electric power in New York. Due to the intermittent nature of wind ...

ALBANY -- The New York State Public Service Commission (Commission) today approved the retail and residential energy storage program Implementation Plan, filed by the New York State Energy Research and Development Authority (NYSERDA) its decision, the Commission directed NYSERDA to modify the Implementation Plan to allow for resources that ...

Kyle Rabin of the Alliance for Clean Energy New York said, "New York's nascent energy storage industry must play a vital role in New York's clean energy transition, and we welcome this proposal for supporting industry growth. We look forward to working with New York's decision-makers as they refine and finalize the Energy Storage 2.0 Roadmap ...

Clean energy positions are in high demand and the market will only continue to expand as New York transitions away from fossil fuels. Careers in clean energy also typically offer above average salaries, healthcare, and other great benefits. No matter if you're just entering the workforce or looking to switch to a new career, what better way ...

Today New York Governor Kathy Hochul announced that the New York State Public Service Commission has approved a new framework for the state to achieve a nation-leading six gigawatts of...

New York State's Climate Agenda. New York State's climate agenda calls for an affordable and just transition to a clean energy economy that creates family-sustaining jobs, ...

NYSERDA is advancing a more resilient grid to bolster New York's clean energy system and withstand future extreme weather events and climate impacts. ... as well as energy storage, to deliver clean energy from where it is generated to ...

Building New York's clean, resilient, and affordable energy system. The Clean Energy Fund (CEF), approved by the Public Service Commission (PSC) Order on January 21, 2016 and later modified on September 9, 2021 was established as a commitment to clean energy and efficiency measures, recognizing that deploying programs at scale has potential to ...

The New York State Energy Research and Development Authority (NYSERDA) today announced more than \$1.2 million has been awarded to four innovative clean hydrogen research and development (R& D) projects

through the Advanced Fuels and Thermal Energy Research Program. ... clean power generation and storage, and advanced fuels and thermal ...

Battery energy storage plays a pivotal role in improving grid reliability, stabilizing electricity prices, harnessing the full power of renewable energy, reducing New York's reliance on fossil fuels, and transitioning to a ...

As renewable power sources like wind and solar provide a larger portion of New York's electricity, storage will allow clean energy to be available when and where it is most needed. In June of 2024, the Public Service Commission increased the Climate Act goal of 3,000 MW by 2030 to 6,000 MW in that same timeframe and established an interim ...

The Clean Energy Standard filings, orders, and reports published by the Department of Public Service (DPS) provide the most in-depth description of the Clean Energy Standard and related regulation. They can all be found on this page and are in reverse chronological order, arranged by year.
