

Will Nigeria gain 20 gigawatts of energy in the next 10 years?

For instance, RMI and the Global Energy Alliance for People and Planet (GEAPP) have recently revealed a plan showing that Nigeria could gain over 20 gigawatts of energy in the next 10 years by rapidly expanding renewable energy and battery systems.

Does Nigeria have a power problem?

Nigeria, Africa's largest economy and leading oil producer, faces a significant power dilemma. According to the International Energy Agency (IEA), 140 million people in Nigeria lack access to electricity, constituting 71% of the country's population.

Is wind energy a good idea in Nigeria?

Wind energy also looks promising in Nigeria. In places like Enugu, Owerri, and Onitsha, wind speeds have been measured at 5.42, 3.36, and 3.59 meters per second, respectively. In particular, the wind speed in Enugu is high enough to generate electricity effectively, according to wind power standards.

What is Nigeria's power sector?

Today, the country's power sector comprises several key actors, including state-owned companies, private entities, and regulatory agencies that work to sustain Nigeria's power reforms. The Federal Ministry of Power oversees policy formulation and provides overall direction to other agencies within the power sector.

Will Nigeria transition from diesel & petrol generators?

For its power sector -- one of the five major sectors tackled by the plan -- Nigeria plans to transition away from diesel and petrol generators, which currently supply most of the country's power.

How has Nigeria improved its electrification rate in 2022?

All these reforms have helped the country increase its electrification rate. As of 2022, 60.5% of its population has access to electricity. This figure is already a milestone, given that in 1990, it was only 27.3%. The Electricity Act 2023, enacted in June 2023, is another giant modernization step for Nigeria's power sector.
