while a battery plus solar system may be a good investments, I've yet too see one that beats just getting a standalone solar system, particularly right now in SA despite our high electricity costs because you can get really good feed rates, e.g. 18c from Origin at the moment. \$16,000 is a lot of money, for around \$6000 or less you should be able to get a stand-alone ...

Our innovative online experience takes the hassle out of going solar. It's as simple as requesting a quote, signing up and tracking it to installation - all from your device. We're just a phone call ...

ShineHub is a leading installer of solar battery solutions in SA (including the #1 battery installer in the SA government Home Battery Scheme (HBS) between 2018-2023) and has a history of running successful solar bulk buy programs for SA councils.

Just wondering what you think of ShineHub's current offer of solar panels + battery in exchange for signing a 20 year contract to buy the surplus electricity generated - is it a good deal or not... I couldn't find many reviews outside of the ones on Shinehub's site but I may have missed them due to my search queries.

VPP credits are the new solar feed-in credit. With the ShineHub Community VPP, you get paid a premium rate every time your battery is used by the grid. It doesn't matter if you're sending excess power to the grid or getting extra power from the grid. You get paid \$0.45/kW every time. That's passive income just for having a solar & battery ...
