

Who owns nomadd desert solar solutions?

NOMADD Desert Solar Solutions, a photovoltaics cleaning system and spin-out company from KAUST, has secured a strategic investment by the Saudi construction company CEPCO. File photo.

Who is CEPCO investing in nomadd desert solar solutions?

File photo. NOMADD Desert Solar Solutions, a photovoltaics (PV) cleaning system and spin-out company from KAUST, has secured a strategic investment by the Saudi Arabian construction company CEPCO. The Series B investment round will support NOMADD's project pipeline and will further strengthen the company's growth ambitions.

Does nomadd clean solar panels?

NOMADD supplies waterless robotic cleaning systems for solar arrays. In the Middle East dust is the primary factor affecting solar plant performance. As all eyes in the solar industry are now focused on the many huge solar deployments in the pipeline across the region, the question of solar panel cleaning is a key part of the conversation.

Where is nomadd developed?

NOMADD was developed at the King Abdullah University for Science and Technology, (KAUST) near Jeddah, Saudi Arabia. Why NOMADD? Waterless, laborless and fully automated desert ready solution. If playback doesn't begin shortly, try restarting your device.

What does nomadd do?

NOMADD ( NO water, M echanical A utomated D usting D evice) designs and supplies fully automated, waterless cleaning robots, corresponding software as well as after-sales services to photovoltaic (PV) developers and engineering procurement and construction (EPC) companies.

Who owns nomadd & CEPCO?

NOMADD was founded in 2012 as a spin-off from King Abdullah University for Science and Technology (KAUST) and has its headquarters in Saudi Arabia. KAUST and DSM Venturing are the Series A investors in NOMADD. CEPCO is a leading construction company in the Saudi power transmission and distribution industry.

14. What specifications are needed to install the NOMADD on different array designs? Ideally, integration of the NOMADD system with an array design occurs at the design phase of the array mounting structure. The system can vary simply be integrated during the design phase with a simple custom bracket that links the track to the mounting structure.

The achieved objective has been to make NOMADD desert-proof - as the arid environment causes things to break down at higher frequencies. The device is basically machined aluminum and stainless steel. ... Unlike

some other solar panel cleaning solutions from North American and European companies, designed for mild climates, that use water and ...

Thanks to the Patented "Cleaning Angle" mechanism, NOMADD is unbeatable at scale. The unique "pivoting brush endpoints" allow the system to operate with several key advantages: Only two direct drive motors on the entire assembly. - All the electro-mechanical components are in the "head" of the machine.
