

Does Norfolk Island have too much solar energy?

That's pretty impressive given its remoteness and a population of 1,849. But this uptake has also caused some headaches in managing Norfolk Island's electricity network, with too much solar energy goodness generated at times. The Tesla battery system installed in December 2020 has helped out on that front.

How many solar panels are there in Norfolk Island?

44 km of high and 44 km of low voltage cabling. Distributed household rooftop PV systems. There have been more than 555 small-scale solar power systems installed on Norfolk Island, with a collective capacity of 1,770 kW. That's pretty impressive given its remoteness and a population of 1,849.

Will Australian government help Norfolk Island's diesel-based electricity cost woes?

The Australian Federal Government has stepped in to give the folks on Norfolk Island some relief from their diesel-based electricity generation cost woes. Norfolk Island is a tiny island (3,455 hectares) in the South Pacific Ocean.

Norfolk Island's power goes 100% renewable (solar) at the end of this year. The Bounty Museum got switched over today so that we now can do our bit and feedback into the ...
