

Who is Oiltech as?

Exceeding expectations For over 30 years, Oiltech AS has been a leading supplier of heat transfer and energy storage products such as accumulators, oil coolers, pumps and filter units to the oil and gas and marine industries.

What is Oiltech doing with accumulator racks?

Talking about recent endeavours Erik comments: "Oiltech recently worked on a project with Advanced Production and Loading (APL), to supply accumulator racks, which hold large accumulators that are around four metres long. They are individually built and fitted into the frame.

How does Oiltech maintain its high standards?

Oiltech ensures it can maintain its high standards by focusing on R&D, specifically relating to health, safety and environmental (HSE) issues. Erik comments: "Our customers often have very specific requirements not only in terms of performance and function but also in terms of health and safety regulations.

What does a hydraulic lubricator do?

These include temperature optimisation of fluids in hydraulic, lubricating and heat transfer systems; fluid energy control; hydraulic and lubricating systems and related accessories and technical support.

Why should you choose Oiltech?

Of course, this is also combined with on time delivery. As a part of the worldwide Olaer-group, Oiltech has access to expertise and know-how from many countries and is ISO 9000 certified. However, we also have the ability to act as a small company by working in close cooperation with our customers.

Connected Hydraulics will leverage the power and intelligence of Bosch Rexroth's advanced hydraulics technology to break through limits and set new benchmarks for performance, functionality and lifetime. Gear Pump ...

Oiltech EHP piston accumulators offer a versatile energy source for a wide variety of fluid power systems applications such as: Hydraulic energy storage A piston accumulator ...

Oiltech Conductor Tensioning Units are built to suit precise requirements of the Jack-up. Bulkhead Guidance System Bulkhead guidance systems are used to restrain the BOP and trees during transportation from centre of rig to storage position Hydraulic Power Units Oiltech provide a range of Power Units from dedicated units (dedicated to a

Oiltech manufactures piston accumulators in carbon steel for pressures up to 350 bar and volumes from 1 to 185 litres. The document provides specifications for various accumulator models including dimensions, weights, ...

Air Oil Coolers Oiltech LOC Brochure. EN. ... Olaer Group is a global player specialising in innovative, efficient system solutions for temperature optimisation and energy storage.&lt;br /&gt; All over the world, our products are ...

Oiltech's QPM range of gerotor type of low pressure pumps has been a big seller on the market for many years.High performance,light and compact,low noise level as well as low energy consumption are strong arguments for having a QPM3 installed in your system for the circulation of oil.The QPM3 pump has a resili-

Now distributing to over 20 countries, Oiltec provides a complete range of lubricating oils, from engine oil to automatic transmission fluids, greases and hydraulic oil. TecX lubricants are made from first-grade mineral, virgin base ...

The Olaer Group is a global player specialising in innovative, efficient system solutions for temperature optimisation and energy storage. All over the world, our products are working in the most diverse environments and applications, e.g. the aircraft, engineering, steel and mining industries, as well as in sec-

Our Storage &quot;Efficient. Secure. Innovative: Oil Tech LLC 's Storage Expertise ... Step into a world of energy mastery with our carefully curated product lineup. Born from mixed Hydro Carbon Distillation, our Light Oil promises clean combustion, while Diesel offers versatile power, and Fuel Oil ensures unwavering energy supply. ...

. Hydraulic pump. In other types of pumps, devices are grouped that are used for the movement and pumping of fluids.Pumps and motors are reverse-functioning hydraulic machines and actuators. While pumps use mechanical energy to increase the pressure of a liquid, motors use hydraulic pressure to generate a rotational movement.Hydraulics consists of ...

For a gravity hydraulic energy storage system, the energy storage density is low and can be improved using CAES technology [136]. As shown in Fig. 25, Berrada et al. [37] introduced ...
