

# Oslo companies investing in energy storage

Is stationary energy storage a good idea in Norway?

Electric cars now account for 79 per cent of new cars sold in Norway, and the MS Medstraum was recently launched as the world's first electric fast ferry. In a global report on lithium-ion batteries, Norway ranked first in sustainability. These are impressive records. Even so, stationary energy storage is beginning to steal the limelight.

Does Norway have a battery market?

Today Norway has not one, but two huge battery markets. "There are two market drivers for batteries: EVs and stationary energy storage. Energy storage is coming on strong now. It's the key to turning intermittent wind and solar into a stable energy source," explains P&#229;l Runde, Head of Battery Norway.

Is Norway a good place to buy EV batteries?

An early adopter of electric transport, Norway continues to capture EV battery headlines. Electric cars now account for 79 per cent of new cars sold in Norway, and the MS Medstraum was recently launched as the world's first electric fast ferry. In a global report on lithium-ion batteries, Norway ranked first in sustainability.

Who are Norway's Big Three battery cell companies?

A few years ago, Norway's big three battery cell companies - Beyonder, FREYR Battery and Morrow Batteries - were only promising, high-tech blueprints. "Now these large projects are mature. They are talking to potential clients.

According to the UN Panel on Climate Change, the capture, transport and storage of CO<sub>2</sub> emissions from the combustion of fossil energy and industrial production is crucial in order to reduce the world's greenhouse gas ...

Norway is at the forefront of energy storage innovation, leveraging its rich hydropower heritage and cutting-edge technologies. Renowned for its extensive hydropower infrastructure, the country ...

Let's have a look at three hydrogen energy storage companies to watch out for in 2024. 1. Enapter. Company Profile. Enapter is a German-based company founded in 2004 with a long history of successful R&D and ...

October 5th, 2022 - ECO STOR, the Norwegian provider of energy storage systems, today announces a successful NOK 100 million investment round attracting both existing and new shareholders. "We are excited to see that ...

Do you have energy storage FOMO yet? ("Fear of Missing Out") Given all the headlines and hype, you would be normal if you did. But in order for the energy storage market to realize on the somewhat insane \$620B in projected investments by 2040, then we need venture capital and strategic investors to scale battery companies

that reduce costs, have longer ...

We operate in the Danish North Sea with a 36.8 per cent non-operated interest in the Danish Underground Consortium ("DUC"). The DUC holds 4 hubs containing 15 fields that have a production history of over 50 years, four export pipelines ...
