pH Sensor LE 438 LE Sensor - Affordable and Reliable. 3-in-1 plastic pH electrode with integrated temperature sensor for field use, samples with fluctuating temperatures; low-maintenance. Tried and trusted features. This robust plastic pH electrode is always ready to ...

Sol. Almacenamiento InLab pH/Redox 250mL Soluciones excepcionales. Hojas de datos de seguridad (SDS) disponibles. Todas las hojas de datos de seguridad se han creado de conformidad con el SGA (Sistema Globalmente Armonizado).

Mtstore offers a storage solution for InLab pH electrodes in a 250ml container, ensuring proper maintenance and longevity.

Special solution for good and appropriate storage of pH electrodes. Fill the storage vial and insert the electrode, and it will be ready for safe storage over longer periods of time. Electrode storage solutions contain preservatives to ...

InLab(TM) pH Electrode Storage Solution provides optimal conditions to preserve pH probe sensors during the time between measurements and for short- or long-term storage; Probe electrolyte level should always be higher than the sample level; Routinely refilling or replacing the electrolyte solution is necessary to maintain good electrode performance

If an electrode dries out during storage, a regeneration procedure is required to restore the hydrated glass layer and the reference junction in order to make the sensor operable. As a general rule, store your pH sensor in the same solution as the reference electrolyte of the sensor. In most cases, InLab®; Storage solution can be used. Sensors ...
