Panama city energy storage maintenance worker

System Topology

The diagram illustrates the system topology for a solar energy storage system. It shows a central horizontal line representing the main power bus. On the left, a PV panel is connected to an inverter, which then connects to the bus. A charging pile is also connected to the bus. In the center, the Energy Storage System is connected to the bus. To the right of the storage system, a diesel generator is connected to the bus. Further right, a load is connected to the bus. The bus is connected to the Grid on the far right. Above the bus, a Cloud Platform Monitoring System and an EMS (Energy Management System) are shown. A legend at the bottom indicates: DC Line (solid blue line), AC Line (solid black line), and Communication Line (dashed line).
