

Who is powerup?

We develop and produce high-quality and sustainable energy generation products. With 20 years of experience in fuel cell technology development, PowerUP is the innovator in the fuel cell technology market. We are deeply committed to making the hydrogen of tomorrow the reality of today. UP's generators are here to make your life easier and cleaner.

What is powerup energy technologies?

PowerUP Energy Technologies mission is to improve sustainability and reliability of the energy systems. With a vision for a cleaner tomorrow, PowerUP develops and manufactures high-quality, sustainable energy generation products. Boasting 20 years of experience in fuel cell technology, we stand as an innovator in the fuel cell technology market.

Can I share my personal information with PowerUP energy technologies?

Never share sensitive information (credit card numbers, social security numbers, passwords) through this form. This site is protected by reCAPTCHA and the Google Privacy Policy and Terms of Service apply. PowerUP Energy Technologies provides hydrogen fuel cells generators, a sustainable innovative source of energy.

PowerUP Fuel Cells OÜ toodab vesinikul töötavaid elektrigeneraatoreid ja prootonvahetusmembraaniga kütuselemente. Ettevõte pakub kaasaskantavaid ja keskkonnasõbralikke energialahendusi erinevatele turusegmentidele, millest põhilisteks on telekommunikatsioon, ehitus, tervishoid, valitsusvälised organisatsioonid, julgeolek, jahid, ...

The purpose of the project is to develop and assemble in co-operation with Beyonder AS and Nordic Batteries AS a 10,000 W proton exchange membrane (PEM) fuel cell based portable generator, UP10K Pro, which will provide clean energy to a number of industries that require uninterrupted power supply, but is mainly targeted to the construction and mining industry.

PowerUP provides clean and portable energy by delivering a hydrogen fuel cell backup generator solution that can be used for various industries- including construction, telecommunications ...

(: British Indian Ocean Territory, BIOT), 2300 ,60? ,67130?

UP-series generators are lightweight, reliable, and ideal as a main or backup power source for homes or businesses. Their versatile design suits various industries, including construction, military, telecommunications, and healthcare.

With an aim to obliterate these hurdles to seamless electricity generation and storage, Tallinn-based PowerUP Energy Technologies is offering an exceptional line of silent, odorless, and lightweight hydrogen fuel cell

smart electric generators that are far more efficient and sustainable than their traditional counterparts.

Mark Jardine, Managing Editor of Sail-World , talks to Dr. Ivar Kruusenberg, CEO and founder of PowerUP Energy Technologies, at METSTRADE 2021 to find out more about their fuel cell generators which use ...

British Indian Ocean Territory (BIOT) Overview: The British Indian Ocean Territory (BIOT) is an overseas dependent territory of the United Kingdom that was established in 1965. The BIOT is comprised of six main island groups called the Chagos Archipelago. The largest and most southerly of the islands, Diego Garcia, is now used as a joint

Ivar Kruusenberg is the CEO and founder of PowerUp Energy Technologies. After a long career as the University of Tartu scientist, he is now applying his knowledge in cleantech entrepreneurship. We talked in more ...

Discover PowerUP Energy Technologies, the leader in portable hydrogen fuel cell generators. Offering sustainable, zero-emission power solutions for telecom, maritime, military, and off-grid applications.

PowerUP Energy Technologies partners with Meraki Green Development for Hydrogen Fuel Cell Smart Electric Generators in Greece and Cyprus New Partnership Read more. Jun 30, 2022. PowerUp is excited to announce a partnership with AS Labruna! PowerUp has signed a distribution agreement with AS Labruna which will serve as Italy's gateway to ...

According to Power Technology's parent company GlobalData, up to 25.4% of global annual emissions could be tackled with the applications of CCUS. Clarice Brambilla, energy analyst at GlobalData, tells Power Technology: "Firstly, CCUS is currently the only man-made technology that can remove carbon from the atmosphere via direct air capture."

Past Notices:. TAKE NOTICE that, at 10:30am UK time on Friday 9 August 2024, the British Indian Ocean Territory Court of Appeal will hear, in open court, the appeal in the matter of The Commissioner v The King (on the application of VT & Ors) (No. 3) [2024] BIOT CA (Civ) 3. The time estimate for the hearing is one day.

Dr. Ivar Kruusenberg, the Founder and CEO of PowerUP Energy Technologies, has big ambitions for hydrogen cabinets. "We're planning to open more cabinets not only in Estonia, but in Finland, Sweden, France and ...

Take action to support the Marine Energy Technologies Acceleration Act and create a better future for our ocean. By paving the way for a new clean ocean energy future, we can reduce our dependence on dirty fossil fuels and protect the ocean and its wildlife and communities from the worst impacts of climate change. Take action to create a better ...

PowerUP Energy Technologies, based in Estonia, the market-leader hydrogen power technology with the PowerUP fuel cells generator products. <style>.woocommerce-product-gallery{ opacity: 1 !important; }</style>

PowerUP Energy Technologies has 5 employees at their 1 location and EUR118.8 k in annual revenue in FY 2021. See insights on PowerUP Energy Technologies including office locations, competitors, revenue, financials, executives, subsidiaries and more at Craft.

In contrast to traditional diesel-based generators, PowerUP's product range produces zero-emission, is compact & lightweight, operates silently and requires minimal maintenance.

We develop and produce high-quality and sustainable energy generation products. With 20 years of experience in fuel cell technology development, PowerUP is the innovator in the fuel cell ...

Oceans have significant renewable energy options to provide environmental friendly and clean energy. Technology for ocean energy systems and the feasibility for extraction of the same is an ...

PowerUP Energy Technologies" UP3K hydrogen-powered generator represents a significant step towards resilient and sustainable power generation. May 10, 2024. PowerUP Energy Technologies Introduces a First Ever Fuel Cell & Li-ion Super Battery Hybrid Solution. Dec ...

The British Indian Ocean Territory (BIOT) is administered from London. We work to support security and good governance, and preserve marine environment and historical heritage.

At PowerUP Energy Technologies, we are changing energy generation with zero-emission hydrogen fuel cells. We even recycle aged cells and their materials, but we cannot afford to ...

PowerUP Energy Technologies is a company that develops and manufactures energy generation products. It offers electric and portable hydrogen fuel cell-based generators for fuel cell ...

For companies undertaking the transfer of a new space technology to a terrestrial market, a key resource is the know-how of ESA itself ... Energy permeates every aspect of our lives. Space agencies, governments... Environment - Wildlife and Natural Resources ... PowerUp Fuel Cells OÜ. SHARE. DESCRIPTION

The aim of this project is to develop new and innovative bipolar plates (BPP) and membrane electrode assembly (MEA) for PowerUP's air cooled fuel cell stack. Project is in a partnership with a France company HYCCO who will develop novel and ultra-thin carbon fiber based BPPs.

About PowerUP Energy Technologies PowerUP Energy Technologies is an Estonia based cleantech start-up

that produces best-in-class hydrogen fuel cell based electric generators and proton exchange membrane ...

Ocean energy has also been identified as one of the objectives of the EU Blue Growth strategy and it features in the European Commission's recently published Strategic Energy Technology (SET), plan which identifies the main innovative low-carbon technologies needed to achieve the transition to a more sustainable economy.

Recently, I interviewed Dr. Ivar Kruusenberg, Founder and CEO at PowerUP Energy Technologies, a start-up focused on producing best in class portable generators using hydrogen fuel cells.

We screen new energy technologies with world-changing potential, including: The Energy Transition. Our work points to an economic decarbonization of the entire energy industry by 2050, with a CO2 price that averages \$40/ton.. The Ascent ...

Formerly administered as part of the British Crown Colony of Mauritius, the British Indian Ocean Territory (BIOT) was established as an overseas territory of the UK in 1965. A number of the islands of the territory were later transferred to the Seychelles when it attained independence in 1976. Subsequently, BIOT has consisted only of the six ...

Tidal energy technologies. ... (OWC) devices and under water turbines have been developed to produce electricity from waves and tides of the ocean. An innovative under water floating device called Deep Green equipped with hydrodynamic wing and a gearless turbine anchored to the ocean bed with a tether was developed by the Swedish marine energy ...
