

What makes Hyperion different from runergy group?

With Runergy Group's solid cell R&D and manufacturing strength, Hyperion focuses on the R&D, production and sales of high-end modules. Hyperion now has module production capacity of 12GW, which fully matches the next generation of ultra-high power N-type cells technology.

What is nanosun & runergy & American Hyperion solar doing?

Nanosun and Runergy&American Hyperion Solar have unveiled a strategic global distribution agreement, which was formally signed during the RE+Vegas event. Pursuant to the agreement, both companies have committed to collaborate in the exploration of the photovoltaic market in Europe, the Middle East, and the United States.

Does Hyperion have a strategic partnership with re+?

In addition to releasing a new series of modules, the company inked strategic partnerships at RE+. Hyperion, the high-end brand of Runergy, signed a strategic agreement with Nanosun to enter markets like Europe, the Middle East, and the United States. It also entered an agreement with Grape Solar, focusing on the U.S. market.

Who is runergy?

Runergy is one such innovator and has become one of the leading PV cell manufacturers in the world since its establishment in 2013. We are ranked 3rd for global PV cell sales by PVInfoLink from 2020 to 2022 with a current high-efficiency cell capacity of 25GW.

Is runergy a PERC solar module?

Runergy, a solar module manufacturer established in China in 2013, introduced a series of solar module lines at the RE+ conference in Las Vegas. The company displayed both n-type and traditional PERC cell technology. Among the new modules displayed was a 54 half-cell n-type module with a full black aesthetic designed for rooftop applications.

What are the production bases of runergy?

Currently, the company's production bases include: Ningxia polysilicon base, Yancheng cell base, Jianhu ultra-high efficiency cell base, Yancheng Hyperion module base, Thailand cell & module production base, and Yunnan ultra-high efficiency cell base. Through the embedded integrated strategy, Runergy meets the needs of global clients.

sales-inform@runergy 445-465W HY-WH120P8 120 Pieces Half-Cell 21.5% Max. Efficiency P-Type Single Glass Excellent weak light performance Extended mechanical performance Quality Guarantee High Conversion Efficiency Module efficiency up to 21.5% achieved through advanced cell technology and manufacturing process

ABOUT HYPERION In 2021, Jiangsu Hyperion module production base was established in Yancheng. With Runergy Group's solid cell R& D and manufacturing strength, Hyperion focuses on the R& D, production and sales of high-end modules. Hyperion now has module production capacity of 12GW, which fully matches the next gen.
