

Can RV batteries be stored in an RV?

If you store your RV with the batteries in it for a long period of time, you will likely return to an RV with no battery power. It's recommended to remove your batteries during periods of long storage and connect them to a battery tender to keep them up and ready to go. The exception to this is lithium-ion batteries.

What are house batteries in an RV?

In an RV, house batteries are a type of 'deep cycle' battery designed to store substantial amounts of power. Unlike engine batteries, house batteries are meant to supply energy for extended periods, enabling long off-road trips.

Can RV batteries be stored outside the RV?

If RV batteries are mounted outside the RV, consider if there is a safe space that can accommodate them inside the rig. For example, this RV's travel trailer had an empty space behind the front cap that was perfect for storing RV batteries.
