

Can Reunion Island achieve energy autonomy by 2030?

Reunion Island, a French overseas region located in the Indian Ocean, is facing a three-fold challenge combining demographics, the environment and energy. To limit its heavy dependence on imported fossil fuels, Reunion Island aims to achieve energy autonomy by 2030 based on greater energy efficiency and renewable energy alternatives.

What is green energy revolution Reunion Island?

Until recently, Reunion Island had implemented the GERRI project, Green Energy Revolution Reunion Island. This economic and social development program centered on the sustainable development of Reunion Island and resulted from the "Grenelle Environment" French environment roundtables.

Can geothermal energy be developed on Reunion Island?

Geothermal energy also presents significant potential for development, with an installed capacity of 30MW; however, the main problem for this resource on Reunion Island is its location in a protected natural area.

Does Reunion Island use fossil fuels?

Whereas in the 1980s all of the energy produced on Reunion Island came from renewable hydroelectricity, the island has gradually become dependent on imported fossil fuels.

Can Reunion Island make its electricity 100% renewable?

Reunion Island's plan for making its electricity system 100% renewable involved a multi-fold process. This ambition was established in the law "Grenelle 1" No. 2009-967, whereby the French Ministry of Ecology mandated in April 2009 that all new constructions in overseas departments must install solar water heating.

Is biomass a viable energy source for Reunion Island?

The development of biomass on Reunion Island is economically more viable. By 2030 in the transition scenarios, electricity from biomass has advantageously replaced electricity from coal and represents slightly more than 50% of electricity generation.

One thing all forecasted scenarios have in common: The rise of renewables and the fall of diesel power plants. By 2025, diesel power plants - still more than 200MW installed capacity on the island in 2019 and a staple for remote power ...

One of the five French overseas regions¹, Réunion Island is located on the Indian Ocean cyclone path and has a tropical climate. The volcanic island, which is three times smaller than Corsica, is home to one of the world's most active volcanoes: the Piton de la Fournaise (Peak of the Furnace). Economic activity is concentrated along the coasts, where the cities of ...

Like other French overseas territories, Reunion Island has been significantly investing in renewable energy since 2000 [8] and, notably, since 2007 it has adopted a strategy for sustainable development that aims to achieve energy autonomy by 2030 based on greater energy efficiency and renewable energy alternatives [11], [12], [13]. Although half of the island's ...

Reunion Island wants to achieve 50% of renewable energy in its electricity mix by 2020 and self-sufficiency in 2030. Aiming at 76% of renewable energy sources in 2023, and 81% in 2028, this island in the Indian Ocean is ...
