In 2009 LUCELEC embarked on a pilot project to develop an understanding of the issues associated with small grid-tied photovoltaic (PV) or solar systems. The pilot project was structured in two phases and undertaken in collaboration with Solar Power St. Lucia Ltd and the Sustainable Development and Environment Unit of the Ministry of Physical ...

The 5.4kW grid-tied system on Government will save 100 tons of carbon in its lifetime and save the government roughly US\$150,000. ... Solar Head of State assembled an international consortium of project donors from across the clean ...

The new solar farm will provide a path for more renewable energy initiatives and is said to change St. Lucia's energy landscape in the future. The EC\$20 million project, which is funded, owned and operated by ...

On the 11th April 2018, the St. Lucia Electricity Services Limited (LUCELEC) - the sole electric utility company on the island - completed the commissioning of the island's first ...

The customer consumes from the power grid any deficit of energy that the system does not produce. Typical system prices and monthly energy production for 1 kWp, in Saint Lucia, range from US\$3000 to US\$4500 and around 125kWh. Prices for solar PV systems are constantly dropping. Note: PV system sizes are given in kWp, i.e. kilowatt peak. This ...

USTDA's assistance will help develop an enabling regulatory environment for renewables and assess the feasibility of implementing six solar-plus-storage microgrids at ...

In this blog post, we explore the myriad advantages of installing solar PV systems in St. Lucia with Eco Carib, paving the way for a cleaner and more energy-efficient island paradise. 1. Abundant Sunshine: The Ultimate Renewable Resource. St. Lucia, blessed with a tropical climate, boasts an abundance of sunshine throughout the year.

Arlington, VA - Today, the U.S. Trade and Development Agency awarded a technical assistance grant to Saint Lucia's National Utilities Regulatory Commission (NURC) that will advance the country's renewable power generation infrastructure and energy sector resilience. USTDA's assistance will help develop an enabling regulatory environment for ...

Photovoltaic (fo-to-vol-ta-ik) systems are solar systems that produce electricity directly from sunlight. The term 'photo' comes from the Greek 'phos,' meaning light. 'Voltaic' is named for Alessandro Volta (1745-1827), a pioneer in the study of ...

Castries, Saint Lucia, September 29 2017; Today representatives from St. Lucia Electricity Services Limited (LUCELEC) and solar energy firm GRUPOTEC broke ground on a 3 megawatt (MW) solar farm in Saint Lucia, the first ever utility-scale renewable energy project on the island. The 3 MW facility is located near the Hewanorra International Airport in the [...]
