

Securities analysis report on state-owned energy storage equipment manufacturing

Is there a realistic investment decision framework for energy storage technology?

Therefore, in order to provide a more realistic investment decisions framework for energy storage technology, this study develops a sequential investment decision model based on real options theory, which can consider policy, technological innovation, and market uncertainties.

Is there a real option model for energy storage sequential investment decision?

Propose a real options model for energy storage sequential investment decision. Policy adjustment frequency and subsidy adjustment magnitude are considered. Technological innovation level can offset adverse effects of policy uncertainty. Current investment in energy storage technology without high economics in China.

What are the challenges facing energy storage technology investment in China?

Despite the Chinese government's introduction of a range of policies to motivate energy storage technology investment, the investment in this field in China still faces a multitude of challenges. The most critical challenge among them is the high level of policy uncertainty.

What are the factors affecting energy storage technology investment?

In addition, there are also many uncertain factors in technological innovation and market related to energy storage technology investment. On the one hand, Technological innovations appear at random points in time and investors are unable to make decisions between adopting existing and new technologies.

What is the investment threshold for the second energy storage technology?

However, the two investment strategies have opposite findings for the second energy storage technology. The investment threshold for the second technology under the single strategy is significantly lower at 0.0310 USD/kWh than the investment threshold under the continuous strategy at 0.0792 USD/kWh.

What is the investment opportunity value of energy storage technology?

A firm choosing to invest in energy storage technology is equivalent to executing the value of the investment option. In this study, the investment opportunity value of an energy storage technology is denoted by $F(P)$, that is, the maximum expected net present value when a firm invests in an energy storage technology.

In some cases, such as the state-owned energy giant Pertamina, existing SOEs have been reorganized as holding companies and given control over other SOEs in upstream and downstream sectors. In 2021, Indonesia also announced the formation of Indonesia Battery Corporation to coordinate the battery supply chain ecosystem, consisting of Pertamina ...
