

What does the Seychelles government do?

The Seychelles Government is committed to providing adequate, reliable and affordable energy to meet future energy consumption needs and to underpin strong economic growth through consumable energy initiatives. The Seychelles enjoy favourable conditions for renewable energy (RE) resources, such as wind and solar.

What is Seychelles energy policy?

New techniques and technologies will be needed to decarbonise these areas. Seychelles Energy Policy for 2010-2030 recommends a sustainable development of the energy sector focusing on energy efficiency, renewable energy and reducing the dependence on oil to improve energy security. It aims to diversify the energy supply, with a

How is electricity produced in Seychelles?

Electricity for the island nation of Seychelles is primarily produced by diesel generators which must import their fuel (69 MW on Mahe and 12 MW on Praslin). Energy policy calls for 15% renewables by 2030. In June 2013, the first wind farm in Seychelles was officially inaugurated.

How important are renewables in the energy mix of Seychelles?

What is the role of renewables in electricity generation in Seychelles? What are the main sources of renewable heat in Seychelles? Renewables are an increasingly important source of energy as countries seek to reduce their CO<sub>2</sub> emissions and dependence on imported fossil fuels.

How is the Seychelles energy project financed?

The project is a major step toward meeting the Seychelles' target of producing 15 percent of its energy from renewable sources by 2030. It was financed through a grant of US\$28 million from the Abu Dhabi Fund for Development, a government entity that enhances living standards in developing nations.

Does Seychelles use fossil fuels?

Seychelles relies heavily on fossil fuels to meet its electricity demand, with fossil fuels accounting for around 20% of the country's imports. The country has set a target of 5% renewables by 2020 and 15 percent by 2030.
