

Who is EG4 electronics?

EG4 Electronics specializes in premium solar energy components, including batteries, inverters, racking, and solar HVAC systems. Their cutting-edge products are meticulously engineered and tested to maximize energy production for a wide range of applications, from small off-grid systems to large commercial installations.

Does EG4 support solar assistant?

Solar Assistant is a third-party application that is not supported by EG4. The cooling fans on the 6000XP are temperature controlled and do not ramp up until they are needed. Consequently, the fan speed is a factor of load and ambient temperature. Under light loads, the inverter will typically be nearly silent.

Does EG4 6000xp support solar?

Well played, EG4. Whether your batteries are drained or fully charged, the EG4 6000XP supports both AC and solar pass-through, which means you can charge your batteries while simultaneously supplying power to your devices and appliances. It's a really useful feature that would be particularly useful for those living completely off-grid.

How does EG4 customer service work?

With EG4 products, you're greeted by a friendly and knowledgeable customer service agent, usually from the company's home state of Texas. With some solar companies, you're on hold forever, and then when you finally think you got through to someone, it just ends up being a pre-recorded voice speaking in a foreign language.
