

Where are Proterra batteries made?

Our batteries are designed from the cell level up for commercial and industrial usage and have industry-leading energy density, a flexible design, and ruggedized commercial-grade housing. Designed in Proterra's Silicon Valley and manufactured in Greer, South Carolina, by the best minds in battery engineering.

What is a Proterra S series battery?

The Proterra S series batteries already power medium- and heavy-duty applications on the roads throughout North America. Battery packs in the S series have a width of 860 mm and can contain up to 123 kWh of energy storage per pack.

How many kWh is a Proterra battery?

The middle battery size (available for 35-foot and ZX5 40-foot buses) also got a boost from 450 kWh to 492 kWh, which is 42 kWh or 9.3% more. The outgoing 450 kWh battery version was rated at 172-240 miles (277-386 km) of range. A gradual increase in battery capacity is not a new thing for Proterra.

How safe is a Proterra battery?

Every Proterra battery operates with state-of-the-art safety features, including cell-level passive propagation resistance (PPR). With PPR, in the rare event of a single battery cell failure with a thermal event, the issue would not spread to neighboring battery cells.

What is the Proterra battery pack & module architecture?

The Proterra battery pack and module architecture also allows for easy separation of components for recycling purposes, allowing for 100% of aluminum used in the battery pack to be recycled.

Are Proterra EV batteries good for commercial vehicles?

Our flexible design enables Proterra's EV batteries to be the best choice for commercial vehicles ranging from transit buses and trucks to delivery vehicles, construction equipment, and more. The Proterra S series batteries already power medium- and heavy-duty applications on the roads throughout North America.
