The goal of most solar projects is to offset your electric bill 100%, so your solar system is sized to fit your average electricity use. Here's a basic equation you can use to get an estimate of how many solar panels you need to power your home: Solar panel wattage x peak sun hours x number of panels = daily electricity use

Buy local, landline, mobile, toll-free Slovenia virtual phone number online for SMS, calls, create WhatsApp, call center business set up.

Photo: Number of self-consumption power devices in Slovenia and their combined capacity (Energy Agency) An average self-consumption system, or self-sufficiency system, as it is officially called in Slovenia, has 11.9 kW in capacity. There are only 24 devices that use a water source and just three running on wind.
