

What is Energas & AES Dominicana's vision for a sustainable future?

Energas and AES Dominicana shared a vision for a sustainable future in the Dominican Republic by diversifying the country's energy matrix with greener energy solutions while ensuring a strong, resilient grid.

Is solar energy a viable resource for the Dominican Republic?

High solar potential, along with integrating efficiencies and economies of scale, can make solar energy a viable resource for the Dominican Republic. Similarly, wind energy has strong potential, particularly in the southwest.

Does the Dominican Republic have electricity?

Like many island nations, the Dominican Republic is highly dependent on imported fossil fuels, leaving it vulnerable to global oil price fluctuations that directly impact the cost of electricity. Before 1997, the electricity market in the Dominican Republic was regulated and state-owned.

What happened to the electricity market in the Dominican Republic?

Before 1997, the electricity market in the Dominican Republic was regulated and state-owned. In 1997, the markets were reformed to allow private companies to participate in the generation and distribution of electricity.

Does the Dominican Republic need a natural gas infrastructure solution?

However, the Eastern region of the country where Energas' facility is located lacked existing natural gas networks or pipelines to transport natural gas. The Dominican Republic needed a holistic infrastructure solution to strategically shift from conventional generation to natural gas.

Where is Energas located in the Dominican Republic?

Energas is a major electricity generator in the Dominican Republic through the 300 MW San Pedro de Macoris Electricity Company (CESPM) power plant, located in the Eastern region of the country.

Like many of the Caribbean island nations, the Dominican Republic has a diversified power grid that includes solar, wind, hydroelectric, biomass, natural gas, coal, and petroleum sources of electricity. Unfortunately for both locals and travelers, the electrical grid is outdated and in need of serious improvements.

The Dubai Smart Grid Project was completed using smart grid as the technology category. It is an advanced grid infrastructure, renewable integration project with a rated capacity of 50MW. It is implemented in the town/community. The smart grid project is owned by Dubai Electricity and Water Authority.

Washington, DC, U.S.A. --- (METERING) --- July 20, 2012 - Smart grid solutions along with energy efficiency and generation from renewable sources offer the way for ...

Arlington, VA - The U.S. Trade and Development Agency has awarded a technical assistance grant to the

Dominican Republic's Superintendent of Electricity (SIE) that will facilitate the growth of renewable power generation in the country TDA's grant will help create enabling regulations for battery energy storage systems to maintain the stability of the country's power grid as new ...

With its sunny climate and location close to the equator, the Dominican Republic is ideal for solar microgrids. And Espinal believes residents will return as the microgrids electrify small villages. "A lot of people will come ...

The Dominican Republic has a total installed capacity of 3,635 MW with peak demand of 1,800 MW.8 Renewable energy generation in the Dominican Republic makes up 14% of total ...

In the Caribbean, Dominican Republic electrical utility Consorcio Energético Punta Cana Macao (CEPM) has chosen GE to deploy more than 14,000 smart meters as well as an advanced metering infrastructure (AMI) ...

The power sector in the Dominican Republic has traditionally been, and still is, a bottleneck to the country's economic growth. A prolonged electricity crisis and ineffective remedial measures have led to a vicious cycle of regular blackouts, high operating costs of the distribution companies, large losses including electricity theft through illegal connections, high retail tariffs to cover ...

Construction has started on the first major solar-plus-storage project in the Dominican Republic, which features a 24.8MW/99MWh battery energy storage system (BESS). The Comisión Nacional De Energia (CNE) of ...

Santo Domingo, Dominican Republic --- (METERING) --- July 2, 2010 - An advanced metering system is to be introduced shortly in the Dominican Republic to mitigate the effect of poor payers on those who pay their electricity bills on time.Making the announcement Celso Marranzini, executive vice president of the Corporación Dominicana de Empresas ...

GE has been selected by Consorcio Energético Punta Cana Macao (CEPM)--a standalone electrical utility, generating, transmitting and ...

Dominican Republic: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO 2 - the burning of fossil fuels accounts for around three-quarters of global ...

Edenorte, a utility based in the Dominican Republic, has selected Trilliant for the provision of a communications network for smart metering operations; using Trilliant's low power wide area network (LPWAN) to connect some 30,000 smart meters.. The technology is providing Edernote with a reliable and strong communications platform which will help the utility ...

The Dominican Republic has some of the highest energy costs in the world at an average of 0.19 USD per kilowatt-hour (KWh). EDESUR TAKES A PROACTIVE APPROACH TO THE PROBLEM . Edesur is the largest of the three power distribution companies in the Dominican Republic, with 416,637 customers under contract and 633,466 users connected to its network.

USTDA's grant will help create enabling regulations for battery energy storage systems to maintain the stability of the country's power grid as new wind and solar power plants are built. ...

Santo Domingo, Dominican Republic --- (METERING) --- August 7, 2009 - The Dominican Republic's regulator Comisi n Nacional de Energia (CNE) has signed an agreement with Kema to undertake a protection and coordination study for the country's national electrical grid system. The World Bank funded study will assess current protection settings and ...

The objectives of this study are to analyse the impact of electric mobility penetration programmed by the Dominican Republic's INTRANT, the country's goal of reducing ...

Distribution Grid Study in the Dominican Republic The introduction of net metering policies in the Dominican Republic has led to an increasing number of rooftop PV systems. However, restrictive policies, limiting the PV capacity in MV circuits to 15% ...

Other characteristics of a smart electricity grid include automated monitoring tools, superconducting cables, self-optimization of energy measures, and repair. In addition, smart grids, as well as smart meters, can be designed to provide power to homes and businesses and minimize the impact of natural disasters on local communities.

Smart Grid Consulting; Electromobility; Power Generating Unit Modelling; ... The Dominican Republic is experiencing a rapid increase in electric vehicle adoption, resulting in high rates of charging station installations. ... Energynautics has been tasked by GIZ through GET.transform to support the Dominican Superintendency of Electricity (SIE ...

Smart grid developments in Dominican Republic. In other smart grid news coming out of the Dominican Republic, in Q1 2015, the country's electrical utility Consorcio Energ tico Punta Cana Macao (CEPM) chose GE to ...

The growth of renewable energy in the Dominican Republic is supported by the legal framework which includes the General Electricity Law 125-01, Renewable Energy Incentives Law 57-07, General Law on

Environment and Resources Law 64-00, and net metering legislation. ... ? 5.0 5.1 "Greening the Power Grid in the Dominican Republic - ECPAmericas ...

The Energy Transition Project, the Triangular Cooperations and the DeveloPPP Project presented the study "Regulations and Technical Considerations for Electromobility in the Dominican Republic, Explanatory Report".. The publication highlights the most important aspects to understand the transition, pointing out that, in the medium and long term future, electric ...

Construction has started on the first major solar-plus-storage project in the Dominican Republic, which features a 24.8MW/99MWh battery energy storage system (BESS). The Comisión Nacional De Energia (CNE) of the Dominican Republic announced the start of work on the Dominicana Azul solar project shortly in late December (22 December).

In a video posted to yesterday, People in the Dominican Republic showed their disgust for smart meters forced on their homes and businesses, by bringing them back to the utility en masse, in an action reminiscent of Stop Smart Meters! 2010/ 2011 actions in Santa Cruz County, California. It appears that the main complaint here is the high bills, ...

GE (NYSE:GE) has been selected by Consorcio Energético Punta Cana Macao (CEPM)--a standalone electrical utility, generating, transmitting and distributing electricity in the exclusive concession area of Bávaro and Punta Cana in the east of the Dominican Republic--to deliver more than 14,000 smart meters and GE's Grid IQ TM point-to-multipoint (P2MP) ...

The new SIBA Energy natural gas-fired power plant in the Dominican Republic features 12 Titan model turbines. It will have 280 MW of generation capacity when operating in combined cycle configuration.

The company, the local arm of energy giant AES, will build three new projects, Mirasol, Peravia I and Peravia II, which will have a combined capacity of 240MWac, which AES expects to commission...

SAN DIEGO - February 4, 2015 - GE (NYSE: GE) has been selected by Consorcio Energético Punta Cana Macao (CEPM) - a standalone electrical utility, generating, transmitting and distributing electricity in the exclusive concession area of Bávaro and Punta Cana in the east of the Dominican Republic - to deliver more than 14,000 smart ...

Even baseball - a sport played with religious fervor in the Dominican Republic - is affected by the fickleness of the grid. The final game of the 2015 Dominican Winter League Championship, a series boasting talent like former New York Yankee Robinson Cano, had to be suspended in the ninth due to an outage. Try to imagine a World Series game ...

Dominican Republic: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO 2 - the burning of fossil fuels accounts for around

three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.
