

Chinese EV giant BYD has launched what an executive claimed is the "world's first high-performance" sodium-ion BESS product, using its proprietary form factor Long Blade ...

A project in South Africa deployed for grid operator Eskom, which it claimed is the largest on the continent. Image: Eskom . France-headquartered IPP and utility EDF has secured financial close for the second and third of a three-project BESS portfolio in South Africa, projects that won long-term contracts under the country's BESIPPPP scheme.

The power plant consists of 42 BESS containers with 185Ah sodium-ion batteries, 21 power conversion system (PCS) units, and a 110kV booster station. Sineng's 2.5MW string PCS MV turnkey solution is designed to align with the system's wide DC voltage range, supporting rated output power from 700V to 1500V. ...

The BESS is being developed at the site of Australia's largest coal-fired power station (above). Image: Australia's Mining and Energy Union. Australian utility Origin Energy yesterday (30 October) confirmed it had started construction on the second phase of its 2.1GWh Eraring battery energy storage system (BESS) in New South Wales, Australia.

The first phase of the world's largest sodium-ion battery energy storage system (BESS), in China, has come online. The first 50MW/100MWh portion of the project in Qianjiang, Hubei province has been completed and put ...

The plot of land readied for Natron Energy's sodium-ion production facility. Image: Natron Energy / Business Wire. US firm Natron Energy has announced plans for a sodium-ion gigafactory in North Carolina, while two Chinese firms have firmed up their projects, all-in-all totalling over 30GWh of annual sodium-ion production capacity.

Peak Energy will start off by procuring sodium-ion battery cells from other companies and integrating those into grid-scale BESS solutions, with plans to eventually ...

BYD announced construction on a 30GWh sodium-ion (Na-ion) battery gigafactory in Xuzhou City in January, and the firm is also one of the largest battery energy storage system (BESS) DC block suppliers globally. Sodium-ion battery powered electric vehicles (EVs) have been available in China for some time, and the technology's imminent adoption in ...

Sineng Electric has revealed that it has provided its string PCS MV stations for what it said is the world's largest sodium-ion BESS, and China's first 100 MWh-scale energy ...

One of the identically-sized 20MW BESS projects in developer Enfinite's eReserve portfolio in Alberta. Image: Enfinite. A joint venture of UK-based Aura Power and Germany's ib vogt, along with the Canadian development arm of France's Neoen, have recently submitted applications with the Alberta Utilities Commission (AUC) to construct three projects ...

The average cost for sodium-ion cells in 2024 is \$87 per kilowatt-hour (kWh), marginally cheaper than lithium-ion cells at \$89/kWh. Assuming a similar capex cost to Li-ion-based battery energy storage systems (BESS) at \$300/kWh, sodium-ion batteries' 57% improvement rate will see them increasingly more affordable than Li-ion cells, reaching ...

As confirmed on a LinkedIn post published by Geoff Eldridge, National Electricity Market (NEM) and energy transition observer at consultancy Global Power Energy, the BESS asset becomes the second bidirectional unit ...

India's Reliance Industries has completed the takeover of sodium-ion battery company Faradion, while Amazon is set to trial a novel flow battery technology. Premium "Density, cycle life now where they need to be": Sodium-ion BESS investor TDK on technology's state of play ... World's largest sodium-ion BESS comes online in China as it ...

Developer Kona Energy has been granted consent for the construction and operation of its Smeaton BESS project in Scotland, which will total 228MW/456MWh of energy storage capacity. The 2-hour battery energy storage system (BESS) in East Lothian is strategically located to enhance grid resilience and reduce grid constraints, Kona said.

BYD launches sodium-ion grid-scale BESS product. November 27, 2024. Chinese EV giant BYD has launched what an executive claimed is the "world's first high-performance" sodium-ion BESS product, using its proprietary ...

On the 18th of June, the first phase of Datang Group's sodium-ion energy storage project in Qianjiang, Hubei Province, was connected to the grid. With a capacity of ...

The company's Sinestack BESS unit. Image: Rimac Energy. Rimac Energy's SineStack battery energy storage system (BESS) solution will deliver "zero energy capacity fade" for the first two years of operation, a claim the firm's director explained to Energy-Storage.news.. The firm has commissioned its first SineStack BESS product for delivery to a site in Colchester, ...

Like Peak Energy, Natron sees data centres as a potential high-demand end market for Na-ion batteries. In China, the country which currently leads the world for Li-ion production as well as technology development, the ...

As frequent readers of Energy-storage.news might know, the majority of BESS projects built and in construction in Chile are paired with a solar PV project. Although a standalone project, the Arena BESS facility is still located in the northern region of Chile, where most of the solar PV capacity is located, due to its high irradiation levels.. Its proximity to solar resources ...

Sodium-ion batteries have emerged as a promising option due to their abundant raw material, superior performance at low temperatures, better round-trip efficiency, and ...

The deal was penned at All-Energy Australia 2024 last week. Image: Sunwoda. Sunwoda Energy, a subsidiary of Sunwoda Group, one of the world's largest lithium-ion battery OEMs, has signed a deal with Gryphon Energy to develop a 1.6GWh battery energy storage system (BESS) in Queensland, Australia.

Mosaic, which has been utilised in other Australian BESS projects, such as a 100MW/200MWh Tilt Renewables BESS in Victoria and is regarded as the "most widely adopted bidding optimisation software on the National Electricity Market (NEM)", harnesses AI to enable clean energy asset owners to increase revenue, minimise cost, and manage risk while ...

BW ESS, the maritime arm of BW Group, invested around US\$100 million in developer Ingrid Capacity in April 2023 when Ingrid said it had a 400MW pipeline of near-term BESS projects in Sweden. The recent announcement said that Ingrid has an additional 800MW in development, and is active in Finland and Estonia too.

TenneT recently said the Netherlands needs 9GW of new BESS by 2030 but the development of the market is currently lagging behind Belgium and Germany for deployments, both from a regulatory perspective as highlighted by Noordoostpolder municipality but also a highly congested grid. The country's largest BESS at 30MW/68MWh came online last month.

The Natron factory in Michigan, which formerly hosted lithium-ion production lines. Image: Businesswire. Natron Energy has started commercial-scale operations at its sodium-ion battery manufacturing plant in Michigan, US, and elaborated on how its technology compares to lithium-ion in answers provided to Energy-Storage.news.. At full capacity the facility will ...

There are more BESS products out there but relatively few that can really offer grid-forming capabilities, a developer said. Skip to content. Solar Media. ... Peak Energy announces sodium-ion engineering centre in Colorado. Premium "Contender for technology dominance", but "5-7 years behind LFP": Industry reacts to BYD's sodium-ion ...

In November, Chinese EV manufacturer a BYD executive announced the launch of a sodium-ion BESS product, using the company's proprietary Long Blade Battery Cell. Chinese companies, leaders in the battery manufacturing space, are investing a lot into sodium-ion technology. In July, HiNa Battery announced the first 50MW/100MWH portion of the ...

Many more BESS projects coming in Romania . Monsson is also close to expanding the 24MWh project to 96MWh, with testing on the additional capacity due soon. The company has long-term plans to expand that site to 216MWh of energy storage capacity. Numerous other firms are also deploying large-scale BESS in the country.

Sodium-sulfur (NAS) battery storage units at a 50MW/300MWh project in Buzen, Japan. ... Peak Energy announces sodium-ion engineering centre in Colorado. Premium "Contender for technology dominance", but "5-7 years behind LFP": Industry reacts to BYD's sodium-ion BESS news. Georgia Power receives unanimous approval on 500MW BESS ...

BW ESS, the maritime arm of BW Group, invested around US\$100 million in developer Ingrid Capacity in April 2023 when Ingrid said it had a 400MW pipeline of near-term BESS projects in Sweden. The recent ...

Aquila Clean Energy EMEA has started construction on a 50MW BESS in Finland, while MW Storage has launched two new projects in the country. Aquila, a developer and independent power producer (IPP), has started building the 50MW/50MWh standalone battery energy storage system (BESS) in Kotka, southern Finland, it announced on LinkedIn last week.

Li-ion BESS from Fluence, iron-air batteries from Form Energy put through fire testing paces US DOE offers US\$2.5 billion loan to Wisconsin utility for renewables, energy storage projects Peak Energy announces sodium ...
