

When did solar PV start in Peru?

Evolution (years) of the solar photovoltaic installed capacity (MW) in Peru. Figure 21 shows that the first stage of solar PV energy in the country began in 2012, with strong growth from 2012 to 2023. 3.2. Solar PV Facilities Approved and under Construction in 2024

Can solar energy be used in Peru?

Potentialities and Limitations of Solar Photovoltaic (PV) Energy in Peru Solar PV energy advances on a large scale have already been carried out in Peru, as they are environmentally friendly and an attractive option to apply in different geographical locations with solar resource potentialities.

What is the useful solar energy technical potential for Peru?

The useful solar energy technical potential for Peru is equivalent to 25,000 MW. Table 2 shows details of the geographical areas of the country with the greatest average solar energy, where values between 4.00 and 7.00 kWh/m²/day are recorded. Table 2. Geographical areas of Peru with the greatest average daily solar energy .

Where are solar energy plants located in Peru?

These regions are part of the Coast Desert of Peru, in which nine photovoltaic solar energy plants are in operation in 2024. Also noteworthy are the northern regions of the country (i.e., Tumbes and Piura and part of the Sechura desert), which, despite their attractive solar resources, have not been used to date.

Is solar energy progressing in Peru?

The current progress of solar energy in Peru is incipient, so analysis of the solar photovoltaic (PV) facilities that are in operation and improvements and increases in the number of photovoltaic modules and total installed capacity is in progress (Figure 28).

What are the options for concentrated solar power in Peru?

Considering Table 19, which shows the current technologies and technical conditions in Peru, the most viable options would likely be the utilization of parabolic trough collectors and solar power tower projects. Table 19. Characteristics of concentrated solar power (CSP) technologies considering the site-specific conditions of Peru
