

What is IFC's rooftop solar energy facility in Gaza?

The Palestine Real Estate Investment Co's (PRICO) rooftop solar energy facility is IFC's first large-scale solar energy installation in Gaza and is supported by the IFC-Canada Climate Change Program.

Can solar power power a Palestinian enclave?

So, in recent years, people across the Palestinian enclave have been turning to solar energy to power their businesses and homes. Yasser al-Hajj, who owns a seaside fish farm and restaurant, installed solar panels six years ago. "Electricity is the backbone of the project.

Is solar energy a viable investment in Gaza?

According to the journal Energy, Sustainability and Society, 20 per cent of households in Gaza now rely on solar energy. "Over the past two years, entrepreneurs have turned to solar energy because it saves (money) and is a profitable investment," said Shehab Hussein, an engineer at local solar kit company MegaPower.

What is the largest solar installation in Gaza?

PRICO is the largest solar installation in Gaza and the first one for which an ad-hoc grid integration solution has been developed with the grid operator to ensure power evacuation and 24/7 continuity of supply. This is a standard-setting benchmark that is replicable and scalable in other locations.

Are solar panels still used in Gaza?

Raya al-Dadah, head of the Sustainable Energy Technology Laboratory at the University of Birmingham in the UK, says that the solar panels her family uses in Gaza are over 15 years old, so they are no longer new, but, she says, "the water in the shower is still very hot".

How much do solar panels cost in Gaza?

According to him, solar panels can be installed for a starting price of around EUR1,000. Most of the solar tiles used in Gaza come from China. With a minimum of maintenance, they can be used for several years, but their batteries must be changed every two or three years.

The ITC provides a tax credit for a predetermined percentage of the cost of your solar system. The ITC can be applied to a solar system installed on your primary or secondary residence in the United States. The solar system has to have been installed on a property you own after January 1, 2006, for you to be eligible for the credit.
