

Will AMEA power build a solar photovoltaic plant in Djibouti?

Emirati independent power producer (IPP) AMEA Power has signed agreements to build a solar photovoltaic plant in Djibouti. With a capacity of 30 MWp, the construction of the solar plant will be done in the framework of a public-private partnership (PPP).

Why is Djibouti constructing a solar farm?

Djibouti's \$390 million solar farm is under construction in southern Djibouti as a result of a public-private partnership between Djibouti's Ministry of Energy and Natural Resources and Green Enesys, a German renewable energy firm. Construction began in 2018 after \$50 million in funding was secured by the World Bank and other financiers.

Why is Djibouti relying on IPPs?

According to Power Africa, Djibouti has an installed capacity of only 126 MW. Out of this just 57 MW are reliably available to serve a population of nearly 988,000 and its main industries. However, the government is relying on IPPs to exploit Djibouti's renewable energy potential. The government is ramping up its renewable energy capacity.

What does AMEA power do in Djibouti?

AMEA Power will develop the project in partnership with the Sovereign Wealth Fund of Djibouti (FSD). The electricity produced will be sold to Djibouti's public utility *Electricité de Djibouti* (EDD), under a long-term power purchase agreement.

Who signed the JDA in Djibouti?

Whereas, the JDA was signed by Djama Ali Guelleh, CEO of the national utility EDD, Slim Feriani, CEO of FSD, and Hussain Al Nowais. Hussain Al Nowais said, "Djibouti has set an ambitious target for renewable energy and AMEA Power is pleased to help the nation increase the share of renewable energy in its electricity mix."

Who signed the IA in Djibouti?

The official signing ceremony was held in the presence of President Ismail Omar Guelleh. The IA was signed by Hussain al-Nowais, Chairman of AMEA Power, and Yonis Ali Guedi, Djiboutian Minister of Energy and Natural Resources.

The primary reason solar panels are good for the environment is down to their carbon-busting technology. In fact, the average residential solar panel system in the UK saves 0.7 tonnes of carbon dioxide each year. So, amidst the din of "climate emergency" klaxons, it's about time you ditched those grubby fossil fuels. 4. They're silent
