

Why does Botswana need solar power?

Botswana is seeking a reliable and cost-effective electricity source, as hydropower is no longer viable due to droughts [Why does Botswana need solar power?]. To encourage the adoption of PV systems, Botswana imposes 20% import duties on solar lights and lanterns (and 5% on solar batteries), and offers net-metering for rooftop installations.

What are the applications of solar energy in Botswana?

**SOLAR PHOTOVOLTAIC APPLICATIONS** Photovoltaic conversion of solar energy (PV) in Botswana is used for almost all common applications. Role of solar energy in development in Botswana 185 Fig. 4. A brick type solar still developed at RIIC, Kanye, which include lighting, water pumping, refrigeration, communication and fence electrification. 5.1.

What factors favour the development of solar energy in Botswana?

**POTENTIAL FOR SOLAR ENERGY IN BOTSWANA** The factors which favour the development of solar energy in Botswana include: (i) excellent solar conditions. Botswana averages over 3300 hrs of sunshine per year. (ii) Relatively high cost of electricity and other fuels particularly for water heating.

Which solar still is best suited for Botswana?

After years of research and development activities, the RIIC findings concluded that the Mexican and brick solar stills are the best suited for application in Botswana. The Mexican still consists of a moulded fibreglass basin of 1.6 m<sup>2</sup> base area to hold saline water and has gutters on two sides to collect the distillate.

Why do we need a borehole in Botswana?

This borehole, which extends to a depth of 75 meters, plays a pivotal role in supplying water to a community situated about 3 kilometers uphill, where it is of utmost necessity. Thanks to the unwavering dedication of Solar World Botswana, this essential community requirement is now effectively met. Loading...
