

Why is South Africa focusing on concentrating solar power?

The government is focussing on diversifying the power mix by introducing natural gas and renewables, including concentrating solar power (CSP); South Africa has excellent natural resources for CSP development.

Does South Africa need gas?

South Africa continues to dominate coal production in Africa. Despite declining production, falling domestic demand boosts export volumes in both scenarios. South Africa also relies on oil and gas for its energy needs, but recent gas discoveries could reduce its import needs.

Is South Africa reliant on coal?

In the AC, the role of coal in South African industry and power generation is already decreasing, while that of gas and renewables is increasing. South Africa is reliant on coal but is making efforts to diversify as its coal-fired fleet is ageing; new projects will not fully compensate for the decline of the existing fleet.

Will South Africa double in the AC?

The economy could double in the AC with less primary energy demand compared to today by increasing the share of renewables and gas in the energy mix. In the AC, the role of coal in South African industry and power generation is already decreasing, while that of gas and renewables is increasing.
