

## **South Sudan which is the best solar company in**

Is Sudan suitable for solar energy production?

According to Abdeen M.O.(2009,p.9),Sudan is considered one of the best countries for exploiting solar energy due to its average sunshine duration,which ranges from 8.5 to 11 hours a day.

Which solar energy options are available in Sudan?

In Sudan,three solar energy options are available: 1. Solar PV energy: 1000 MW (on- and off-grid) will be applicable in different states within Sudan. 2. Solar CSP technology: 100 MW (grid connected) will be applicable,especially in the northern part of Sudan. 3. Waste to Energy: 80 MW (grid connected) will be applicable in several intended sites.

Should Sudan invest in solar energy?

Given the strong support of the population for this technology and the high solar radiance across the country,Sudan,primarily represented by the government,needs to grasp this rather invaluable opportunity to invest in solar energy. However,the government's present tax policies and lack of incentives act as a large barrier against its diffusion.

Does South Sudan have electricity?

As of recent statistics,access to electricity in South Sudan is staggeringly low,with... Aptech Africa's business strategy has propelled them to unprecedented success in the energy sector. Their experience in PV and solar water pumping is unmatched. My street lighting systems are working perfectly well.

Could Sudan be the world's largest solar photovoltaic area?

The project is funded with \$4 billion from the government and is projected to generate a total capacity of 1.8 GW, which would make it the world's largest solar photovoltaic area. In 2018, the first phase was completed and 50 MW was generated [58, 59]. Sudan could exploit its renewable resources by adopting a strategy similar to Egypt.
