St. Vincent and the Grenadines (SVG) is one of the last untouched corners of the Caribbean. Blessed with verdant volcanic slopes, welcoming locals and remote island outposts that stretch across 70 miles of clear blue sea, it is a place where savvy scuba divers and adventurous island hoppers alike can discover wild adventures both above and below sea.

In St. Vincent and the Grenadines, high mountain ranges and dense forests ensure a water supply that is as pure as possible. The country's lone water provider, the Central Water and Sewerage Authority(CWSA), has over the years managed to build a purely gravity-fed infrastructure, which means pumps are not required in its distribution process.

The solar farm encompasses three separate solar projects, one under a Five Seas Project, another done under a United Nations Development Program (UNDP) promoting access to clean energy service, with the final one under taken by the St Vincent Electricity Services (VINLEC). The solar farm is expected to be completed by October of this year.
