How do I install a solar PV system?

The first step in installing a solar PV system is meeting with a qualified solar installer. During this initial consultation, the solar company will: - Assess your energy needs : By reviewing your electricity bills and understanding your consumption patterns, the installer can recommend the right size and capacity of the solar system.

Why is the Solar Energy Association of Ukraine important?

As the last 2 years have shown, Ukrainians still have to fight for their right to clean energy, so the Solar Energy Association of Ukraine has a public duty to be a place of public opinion and unification of responsible business environment for the inevitability of our state's course to clean and safe renewable energy.

How long does it take to install solar panels?

The process typically takes between 1 to 3 days depending on the complexity and size of your system. Here's what happens: - Mounting the panels : The installers will begin by securing mounting brackets to your roof or the ground (if it's a ground-mounted system). The panels will then be securely attached to these mounts.

How do I choose the best solar panels?

This includes: - Panel placement : The ideal placement for your solar panels is determined to maximize sunlight exposure and system efficiency. - Inverter selection : The inverter is an essential component that converts the direct current (DC) energy produced by the panels into alternating current (AC) energy used by your appliances.

Should you hire a certified solar panel installer?

Your solar panel system installation should be quick, efficient, and minimally disruptive to your life and home. To make sure your panels go up without too much fuss - and are set up to generate the most electricity possible - you should hire an accredited, certified installer, like Sunsaver.

Can you install solar panels on a roof?

Your panels must not stick out more than 60cm from the roof's surface, and no part of the installation can be more than four metres above the roof. Can you install solar panels on the ground? You can install ground-mounted solar panels, though you'll again need more space than you would if you installed panels on a pitched roof.
