exploring the deep and diverse ...

Photovoltaic power generation employs solar panels composed of a number of solar cells containing a photovoltaic material. This source of electricity is powered by the sun and creates no harmful emissions, or pollution. There are no moving parts employed, therefore maintenance is very low, and they are relatively straightforward to install.

We have designed a number of prepackaged solar systems which can remove any number of circuits within your home or business from the grid, we offer a supply only or a supply and installation service for these systems:
