

Why are Syrians using solar panels?

Cut off from the power grid and with fuel costs soaring, Syrians in a poor, embattled enclave have turned en masse to solar panels to charge their phones and light their homes and tents. Solar panels covering rooftops, some of which have been damaged in government attacks, in Binnish, Syria.

Is there a solar revolution in Syria?

An unlikely solar revolution of sorts has taken off in an embattled, rebel-controlled pocket of northwestern Syria, where large numbers of people whose lives have been upended by the country's 10-year-old civil war have embraced the sun's energy simply because it is the cheapest source of electricity around.

Where are solar panels located in Syria?

Solar panels, big and small, old and new, are seemingly everywhere in Idlib Province along Syria's border with Turkey, rigged up in twos and threes on the roofs and balconies of apartment buildings, perched atop refugee tents and mounted near farms and factories on huge platforms that rotate to follow the sun across the sky.

Does Egypt have solar power?

Egypt's government has also tried to boost rooftop solar power by offering homeowners generous incentives. Yet even though Egypt will host this year's international summit on climate change, its dirtier sources of energy continue to overshadow the solar sort. Listen to this story. Enjoy more audio and podcasts on iOS or Android.

Is Egypt a good place for solar power?

The International Energy Agency (IEA) reckons Egypt is one of the world's best regions for solar. Some companies agree, having invested in projects such as the Benban solar park, one of the world's largest, 650km (400 miles) south of Cairo. Egypt's government has also tried to boost rooftop solar power by offering homeowners generous incentives.

Should Egypt install its own solar power?

Egypt's government has found it hard to convince its citizens of the merits of installing their own solar power. In 2014 it introduced a "feed-in" tariff, promising to pay homeowners and companies for surplus solar power they produce. Yet eight years later only a paltry 749 rooftop solar units have been installed.
