

Why are Syrians using solar panels?

Cut off from the power grid and with fuel costs soaring, Syrians in a poor, embattled enclave have turned en masse to solar panels to charge their phones and light their homes and tents. Solar panels covering rooftops, some of which have been damaged in government attacks, in Binnish, Syria.

Where are solar panels located in Syria?

Solar panels, big and small, old and new, are seemingly everywhere in Idlib Province along Syria's border with Turkey, rigged up in twos and threes on the roofs and balconies of apartment buildings, perched atop refugee tents and mounted near farms and factories on huge platforms that rotate to follow the sun across the sky.

Is there a solar revolution in Syria?

An unlikely solar revolution of sorts has taken off in an embattled, rebel-controlled pocket of northwestern Syria, where large numbers of people whose lives have been upended by the country's 10-year-old civil war have embraced the sun's energy simply because it is the cheapest source of electricity around.

Will Syria get 5 per cent of its electricity from renewables?

NERC states that Syria aims to get 5 per cent of its electricity from renewables by 2025. NERC has several tender offers out for wind and solar with the chosen companies to be announced soon. This is not the first time NERC has published a tender offer. In 2007, it published a call for tenders for constructing a 6 MW wind farm in Homs.
