(1) Wind energy is random and volatile. Energy storage can suppress the voltage fluctuation of wind power generation and effectively improve the output characteristics of wind power. Energy storage makes wind power a dispatchable power source. Energy storage can also improve the low-voltage ride-through capability of wind power systems.

The Energy Storage Module is a block that can store 2.5 Mega Joules (MJ) of energy [in Galactcraft 3: 500,000 gJ] for later use. It was added in Galactcraft 2 and replaced the Battery Box from Basic Components. When the block is broken, all the stored energy held inside is lost. Using Aluminum Wire connect a power source such as a Coal ...
