At ENNOVI we design and manufacture products and solutions for electrical battery platform developments, power component, and signal interconnect design solutions. Using our decades of experience in electro-mechanical engineering ...

At ENNOVI we design and manufacture products and solutions for electrical battery platform developments, power component, and signal interconnect design solutions. Using our decades of experience in electro-mechanical engineering and high-precision manufacturing, we work with EV OEMs and suppliers to bring their ideas to life.

ENNOVI's innovative cylindrical cell contacting system, ENNOVI-CellConnect-Round, achieves excellent current density spread. This helps to extend the lifespan of battery packs by reducing the stress on the individual battery cells.

Till Wagner, Product Manager for Energy Systems at ENNOVI, stated, "Our move towards lamination signifies a major leap in our ability to position collectors with precision, without the mechanical constraints imposed by conventional methods. By curating a database of pre-tested PET foils and adhesives, we not only accelerate CCS design but ...
