What is a titanium watch?

That's what titanium is like. People who make watches love using titanium. It's strong, light, and looks different - not too shiny, more matte. But these watches are not just about being tough. They have a simple beauty. When you wear one, it's like saying, "I like things that last long and look good."

Why should you buy a titanium watch?

Material: Titanium ensures a lightweight feel, offering impressive durability, ideal for adventures and daily wear. Movement: Automatic, harnessing the motion of the wearer's arm for power. Design: Sleek, bold, and undeniably masculine, it's as suited for a business meeting as it is for a deep-sea dive. What Makes This Watch Stand Out?

Why should you buy a titanium Elektron smartwatch?

The Titanium Elektron eliminates the one major compromise with most smartwatches - the fact that you have to routinely charge them. It does so by refining and upgrading a technology that has existed in mechanical watches for years but hasn't really seen mass adoption by tech companies, that have wholly embraced the lithium-ion battery movement.

What are Sequent's new smart self-charging watches made of?

Switzerland based start-up Sequent has announced its new Elektron smart self-charging watch collection made of titanium, the lightest and strongest metal cases we ever made. The watch faces are now equipped with solar powered indexes that glow in the dark, which gives the watch a perfect readability and futuristic feel.
