

How big is the photovoltaic market in Poland?

The Polish photovoltaic market is one of the biggest in Europe. Out of 41.4 GW of total photovoltaic capacity installed in 2022 almost 5 GW was installed in Poland. This demonstrates the unwavering growth of investment in solar energy in Poland. Only Germany and Spain report a faster photovoltaic industry growth rate.

What is the current condition of the photovoltaics sector in Poland?

The following article explains the current condition of the photovoltaics sector both in Poland and worldwide. Recently, a rapid development of solar energy has been observed in Poland and it is estimated that the country now has about 700,000 photovoltaics prosumers. In October 2021, the total photovoltaics power in Poland amounted to nearly 5.7 GW.

How many solar panels will Poland have in 2023?

Poland is on track to connect more than 6 GW of new solar photovoltaic (PV) systems to the grid in 2023, bringing the cumulative solar capacity in the country to over 18 GW, according to estimates by the Institute for Renewable Energy IEO.

Should you invest in solar energy in Poland?

As you can see, more and more models allowing the use of solar energy are appearing on the Polish market. The market is highly flexible, which is worth bearing in mind when planning an investment. Renewable energy auctions are the only support scheme currently in place for new photovoltaic power plants.

Will photovoltaic power increase in Poland?

Poland started updating the PEP, which - according to preliminary government announcements - should result in a significant increase of RES shares in the domestic energy mix and by that time (the target needs to be confirmed), 27 GW of power should be generated by photovoltaics.

What is the potential of solar power in Poland?

For example, the Polish Energy Group - Poland's largest energy company - intends to build systems with a capacity of up to 2.5 GW within a decade. The previously calculated potential of PV was 153.484 PJ (42.634 TWh) and would cover 26.04% of Poland's electricity needs (Table 3).
