

What is a technical manual for chromagen solar thermal systems?

This technical manual describes and explains essential principles for the Installation and operation of Chromagen's solar thermal systems. The guide provides product range information, specifications and maintenance of Chromagen's systems.

Does chromagen offer a solar thermal system?

Chromagen carries a different variety of pumps which are tested and approved for the use with solar thermal systems. Different controllers are used for different types of installations, depending on the complexity of the system. Chromagen supplies solar systems, which includes thermostatic control.

What is the Tuvalu solar power project?

The Government of Tuvalu worked with the e8 group to develop the Tuvalu Solar Power Project, which is a 40 kW grid-connected solar system that is intended to provide about 5% of Funafuti's peak demand, and 3% of the Tuvalu Electricity Corporation's annual household consumption.

Where are chromagen solar hot water systems sold?

Chromagen's world-class solar hot water systems are sold to over 35 countries and are recognised across the globe for their high quality, reliability and durability. Today, Chromagen Australia distributes a wide range of residential and commercial solar and energy solutions, including the renowned solar hot water systems.

What was the first large scale solar system in Tuvalu?

The first large scale system in Tuvalu was a 40 kW solar panel installation on the roof of Tuvalu Sports Ground. This grid-connected 40 kW solar system was established in 2008 by the E8 and Japan Government through Kansai Electric Company (Japan) and contributes 1% of electricity production on Funafuti.

Who is chromagen solar?

Supplied & installed by Chromagen; a company with over 60 years in the solar industry and a trusted supplier to many of Australia's largest home builders. Looking for more?

Chromagen ha afinado el diseño y la fabricación de captadores para conseguir una alta eficiencia y durabilidad. Los productos Chromagen además de poseer la certificación Solar Keymark han sido ensayados y homologados según norma UNE - EN 12975. LINEA NEA PRO: captadores económicos, recomendados especialmente para zonas de mayor radiación ...
