

Will Vietnam become a high-income economy by 2045?

As Vietnam aims to become a high-income economy by 2045, especially in the context of the post-pandemic green recovery, the energy sector will be once again called upon to rise to the challenge of supporting this next phase of growth. However, this time the challenge will be even more complex.

Can Vietnam reduce the cost of electricity by 2030?

These benefits are significant for Vietnam. This outcome is not a forecast but rather a road map that illustrates how national ministries, provinces, and corporate stakeholders could collaborate across different sectors to decrease the cost of electricity by 2030 and increase penetration of renewables.

How can a competitive bidding program help Vietnam's wind industry?

It is time now to accelerate the design and launch of competitive bidding programs. Organized and coordinated auction-based scheme for can propel the industry forward, particularly off-shore wind, a domestic clean energy resource which can be immensely beneficial for Vietnam.
