

How much did Gotion & Vines invest in a new battery plant?

Both VinES and Gotion combined for an overall investment of \$275 million to erect a 34.5 acre facility to produce lithium iron phosphate (LFP) battery cells used for VinFast EV modules and energy storage solutions.

What is the Vines battery manufacturing factory?

The construction of the VinES Battery Manufacturing Factory marks a significant step in implementing Vingroup's "three-pillars" battery strategy, including procuring batteries from the world's top manufacturers, collaborating with partners to produce the world's best batteries and conducting in-house research and development for battery production.

What's going on with a VinFast EV battery factory?

Energy solutions division VinES - a member of Vingroup alongside VinFast - and Gotion Inc have broken ground on a 34.5 acre LFP battery factory designed with an annual capacity of 5 GWh. That equates to roughly 30 million battery cells per year to support future VinFast EVs.

How many battery cells are needed for VinFast EVs?

That equates to roughly 30 million battery cells per year to support future VinFast EVs. VinES Energy Solutions is the R&D division of Vingroup in Vietnam, focused specifically on energy storage applications and the manufacturing of battery technologies.

Where are VinFast EV batteries made?

Located next to the VinES battery pack manufacturing in the Vung Ang Economic Zone, this new factory will complete the closed loop production of LFP Batteries in Vietnam, thereby improving localization for VinFast's EVs and optimizing production efficiency.

What is Vines & VinFast merger?

VinES also cooperates with leading global battery technology partners and seeks to become a comprehensive energy solution provider. Under the terms of the merger, VinFast will acquire all VinES' intellectual property related to battery cells, battery packs, manufacturing facilities, technology, partnerships, and supplier contracts.

VinFast/VinES are self-developing packing and BMS [battery management system] technology as well as NCM cell technology (cylindrical cells and prismatic cells), as well as partnering with Gotion (LFP cell), CATL (C2C), ...

Darius Vines turned in a not-altogether-horrible rookie campaign for the Atlanta Braves in 2023, but 2024 was a nightmare on every level. After being poised to join the shuttle between Gwinnett and Atlanta for the near future, he instead lost his 40-man roster spot and now finds his health in question.

VinES is a member of Vingroup - the largest private conglomerate in Vietnam. Established in 2021, VinES focuses on research, development and production of batteries for electric vehicles (EV), medium and high power tools, other mobility applications and energy storage solutions. VinES offers a DIVERSE and VALUABLE product portfolio that is tailored to meet a wide range ...
