

Who owns the Voith company?

On January 1, 1867, the only son of 63-year-old Johann Matthias Voith, the 26-year-old Friedrich Voith, took over the business as the sole owner. Under his leadership, his father's workshop became a larger company and specialized in paper machines and the construction of water wheels and turbines.

Who owns Voith Siemens hydro power generation?

The year 2000 saw the creation of Voith Siemens Hydro Power Generation, a joint venture of the two leading manufacturers of turbine and generator technology. At the helm of the company, Michael Rogowski transferred operational responsibility to Hermut Kormann in 2000.

Where do Voith engineers work?

Around 300 engineers work at Voith headquarters in Heidenheim and four other locations around the world, in São Paulo, Brazil; York, Pennsylvania, USA; Noida, India, and Västerås, Sweden. The "Brunnermühle" is where Voith develops generators, turbines, control technology, shut-off valves and other hydro components.

How many employees does Voith have?

Within just a few years, the number of employees in the USA rose from just under 200 to over 1,300. In 1985, Voith opened a production facility in Hyderabad, India.

Does Voith have an innovation lab?

In fiscal 2016/2017, Voith opened its own Voith Innovation Lab in Berlin to boost the process of innovation in the company. Matthias Georgi, Tobias Birken, Anna Pezold: Voith: 150 Jahre deutsche Wirtschaftsgeschichte, Siedler Verlag 2017, ISBN 978-3-827501-11-0.

What happened to Voith GmbH & Co KGaA?

On August 1, 2017, Voith GmbH changed its name and legal status to Voith GmbH & Co. KGaA. In fiscal 2017, all the company's shares in KUKA were sold. In the same year, Voith acquired a majority stake in the German digital services provider Ray Sono.

Siemens Energy and Voith have agreed that Voith will take over Siemens Energy's 35 percent stake in the joint venture Voith Hydro. The parties have agreed not to disclose the purchase price, and the transaction is still subject to the approval of the authorities.

Since recovered paper, bales and many contaminants make the pulping process in stock preparation more difficult, a robust process and resistant machines are essential in pulping. An investment in the Intensa family from Voith is particularly worthwhile, as Voith combines robustness with low energy consumption and fiber loss.

Besides fluctuating types of generation such as wind and solar energy, there is a "hidden champion" among renewable energy sources that is ideally suited for generating green ...

Voith Paper's customer magazine together is published twice annually in German, English, Chinese and Russian. Together covers articles and reports about new products, start-ups and rebuilds. ... Energy Saving and Productivity ...

Whether for buses or commercial vehicles, Voith has been an integral part of and major driving force in the e-mobility segment for more than 25 years. This status is based on six success factors, all of which pursue a common goal: To constantly create new and pioneering solutions and innovations for electric mobility.

This reduces the weight of these floating powerhouses, which makes them even more maneuverable and reduces energy consumption. And this also opens up new options for the design of the remote-controlled vessels. ... Voith's ...

Voith actively promotes comprehensive measures to reduce CO₂ emissions (Scope 1 and 2) at its global locations. The focus is on increasing energy efficiency and expanding renewable energies. When it comes to climate protection, Voith strives to play a pioneering role in the plant and mechanical engineering sector worldwide.

Overview Company history Corporate structure Research & development Literature The Voith Group [f?Yt] is a global technology company. With its broad portfolio of systems, products, services and digital applications, Voith sets standards in the markets of energy, paper, raw materials and transport. Founded in 1867, Voith today has around 22,000 employees, sales of EUR 5.2 billion and locations in over 60 countries worldwide and thus is one of the larger family-owned companies i...

With different modernization and upgrade concepts, your hydropower plant's efficiency, power and energy production will be increased significantly. toggle menu. Modernization. CONTACT OUR EXPERTS. ... Worldwide, Voith has equipped more than 25% of all pumped storage power plants. Pumped storage technology offers the best combination of high ...

Voith Turbo offers components for oil and gas infrastructures that enable operators to improve their energy balance and reliability. Voith Turbo technologies for zero CO₂ emissions are ...

With the latest rating, Voith improved its overall result by 21% compared to other companies. Voith was able to make significant progress in the areas of "Environment" and "Sustainable Procurement" in particular, among other things by aligning its sustainability activities with the 10 principles of the UN Global Compact and the voluntary commitment to science ...

With Voith retarders, up to 90% of all braking operations can be achieved without any wear. Your brake is always available when the situation gets dicey. The benefits are numerous: More comfort, reduced wear, less

time spent in the ...

Keep your energy flowing. Voith HyService is committed to extending the life of hydropower plants and keeping them operating at peak level, wherever they are. For more than 150 years of experience in manufacturing, installing and maintaining hydropower equipment, Voith is your competent service partner. ...

Lean back and relax with Voith energy absorption elements. Our solutions deliver a safe and comfortable ride. In everyday operation, the energy absorption elements dampen shocks and ensure smooth driving behavior. Under exceptional conditions, they compensate for large forces, thereby providing the best possible protection for passengers and ...

Cuba's transition to renewable energy generation would reduce greenhouse gas emissions, helping to mitigate climate change and reduce local air pollution, while also providing a more resilient source of power compared to ...

In order to gain access to the MyVoith platform, please complete the registration form below. Should you have any problems during the registration process, please contact our online support, who will be happy to help you.

As a reliable partner for 150 years, Voith offers everything needed for the efficient and future-oriented creation of hydropower. The portfolio includes all components for large and small hydropower plants as well as for pumped storage power plants - from generators, turbines, pumps and automation systems to spare parts, maintenance and training services as well as digital ...
