

How much energy does a Volvo energy storage unit store?

The energy storage system is available in two sizes, with 450 or 540 kWh energy content. The unit is installed in a ten-foot container and, according to Volvo Energy, measures 2.4m x 3.0m x 2.7 metres and weighs around 7.5 tonnes. The special feature of the battery storage unit is its integrated 240 kW DC fast charger.

Does Volvo energy offer battery storage with DC charger?

about „Volvo Energy presents stationary battery storage with DC charger" Volvo Energy has presented the PU500 BESS (Battery Energy Storage System) mobile power supply system with battery capacities of 450 to 540 kWh. The special

What is a Volvo pu500 energy storage system?

According to Volvo Energy, the PU500 (Power Unit 500) is aimed at applications such as remote construction sites, major events with unusually high temporary energy requirements or logistics depots with insufficient grid connection. The energy storage system is available in two sizes, with 450 or 540 kWh energy content.

How many EVs can a Volvo pu500 charge?

Volvo Energy reveals commercial PU500 battery energy storage system (BESS), with a capacity from 450 to 540 kWh, and can operate in connection with the grid or as an "island." The PU500 features a 240 kW DC fast charger, and can store enough energy to recharge 20 EVs, Volvo Energy says, or charge a heavy-duty EV truck in 1.5 hours.

How much energy storage does a Volvo pu130 have?

Volvo PU130 has 130 kWh of energy storage. The PU130 is based on Portable Electric's proprietary 48-volt direct current fast charging (DCFC) technology. It provides the ability to charge equipment in less than an hour with 130 kWh of energy storage capacity and a 20 kW charge rate.

What makes the Volvo pu500 different from other battery storage solutions?

That's great, but what sets the PU500 apart from other battery storage solutions is its integrated 240 kW DC fast charger. "With an integrated CCS2 charger, the PU500 is designed to work with all brands of electric equipment, trucks, and passenger cars," says Niklas Thulin, Head of BESS Product Offer at Volvo Energy.
