

Is the Sahara based on economic resources?

The idea of the economic viability of the SADR being based on its economic resources is also found in Shelley (2004) and echoed by MINURSO and UN Special Envoy to the Sahara, James Baker. Kingsbury (2015) establishes that Western Sahara is illegally and militarily occupied by Morocco.

Is natural resource exploitation a problem in Western Sahara?

As the issue of natural resource exploitation in Western Sahara has been conceptualised in very different ways and from the perspectives of a variety of disciplines, the authors have opted for a semi-systematic review of the work done encompassing academic, non-academic, and activist backgrounds.

How interdisciplinary is research on natural resource exploitation in Western Sahara?

The production of research on natural resource exploitation in Western Sahara is accelerating. Yet this field remains interdisciplinary, and the work is carried out by researchers from academic, non-academic, and activist backgrounds, with sometimes very different aims and envisaged audiences.

Is Western Sahara an interdisciplinary field?

"Western Sahara, Resources, and International Accountability." *Global Change, Peace and Security* 27 (3): 285-299. The production of research on natural resource exploitation in Western Sahara is accelerating. Yet this field remains interdisciplinary, and the work is carried out by researchers from academic, no...

Does German government support Siemens Energy in occupied Western Sahara?

The German government has clarified that its financial support for Siemens Energy will include a provision excluding the firm's projects in "Moroccan-occupied Western Sahara". French EDF Energy announces its partnership in gigantic green hydrogen production project in occupied Western Sahara.

What role did natural resources play in the Western Sahara conflict?

The majority of research undertaken from a historical perspective on the role of natural resources in the Western Sahara conflict focuses on phosphates. Both Laluthe (1976) and Camprubí (2015) see the potential exploitation of phosphates as the key factor in motivating Morocco to invade Western Sahara.

Note for old Energy Toolbase users: we created the "ETB Legacy" series of Documents to replicate our default Document/Proposal used on the older version of Energy Toolbase. Depending on which Document(s) you select and how ...

Tables & Graphs of "ETB Analytics": Monthly Electricity Costs: displays a 12-month summary table of electricity costs. You can select which rate schedule option, as well as several other values to display. Demand Profile Visualization: an interactive charting environment that allows users to visualize and interact with their customer's interval data, including usage data, solar ...

This eliminates guesswork and empowers users to make informed decisions based on the engine's simulations. As the energy landscape continues to evolve, Acumen AI is poised to adapt and lead the way in optimizing energy storage systems for maximum savings and efficiency.

So far, no oil and gas have been discovered in Western Sahara. Two exploration licences are today operated by foreign companies, both from Israel, both offshore.

Our goal at Energy Toolbase is to provide the highest level of support and service in the industry, at a reasonable price. In order to onboard, train, and support all of our users in a timely fashion, we require that all support requests come directly from current, active, named users on ...

Morocco risks implicating other states by exporting Western Sahara energy, for instance to the EU. The EU has promised not to import green energy from the territory, but is unlikely the EU will be able to differentiate energy generated in Morocco proper and energy generated in the occupied territory, as it will pass in cables under Strait of ...

These planned energy exports would make the European and West African energy markets partially dependent on energy generated in occupied Western Sahara. The Saharawi people are 500,000: around 30-40,000 live under the Moroccan military occupation and the rest live in the Tindouf refugee camp (the capital of the exiled SADR) in Algeria and some ...

Modeling energy storage is complex, but we're here to help. We know many developers are trying to understand the best practices of modeling projects, how to tell storage, and its benefits for customers. At Energy Toolbase, we are experts in helping you navigate this new technology and analyzing it in ETB Developer.

Copy and paste the data into Energy Toolbase, matching up the correct timestamp, units, and starting date of the data. Green Button Data - XML & CSV: Interval data can also come from XML or CSV files imported from "Green ...

Scanify, the solar industry's leader in PV design and field operations software, is thrilled to announce an integration with Energy Toolbase (ETB), a leading provider of energy project modeling and financial analysis software. This strategic partnership streamlines the solar project lifecycle, from initial customer quoting and remote design tools to detailed site ...

12 Months" Worth of Utility Bills: Upload 12 months of your most recent utility bills to give us a complete view of your energy usage. Supply Bills for Deregulated Markets: If your project is located in a deregulated market, your supply bills may be issued separately from your utility bills. It's crucial to upload these as well, as they allow ...

Here's a video tutorial of Creating a New Proposal from scratch (in under 8 minutes). You can create a new

"Proposal" from the "Proposal" drop-down menu on the top navigation menu from anywhere on ...

Unleash the Power of Data: Visualizing Western Sahara's Energy Landscape. Shedding Light on Progress, Empowering Sustainable Solutions. Illuminate Possibilities, Empower Energy ...

Energy Toolbase is an industry-leading software platform that provides a cohesive suite of project modeling, energy storage control, and asset monitoring products that enable solar and energy storage developers to deploy projects more efficiently. Greentown Labs is a 501(c)(3) nonprofit accelerating climatetech innovation and commercialization ...

WSRW has produced four reports on the energy industry in occupied Western Sahara, two on renewables and two on oil and gas. Totally Wrong (Citation 2013b) focuses on the activities of the Total oil company in occupied Western Sahara. At the time, Total was the enterprise most heavily involved in oil exploration and had conducted the most ...

Western Sahara Resource Watch works to uncover the plunder of the territory and to keep the companies and governments accountable for their support to the occupation. ...

ETB Sheets is a new Custom Reference Variable input type in Energy Toolbase that can be used in both Transactions and Incentives. This input type has spreadsheet capabilities that allow you to use reference variables and can perform simple or complex calculations. ETB Sheet Guide.

The initial stages of another renewable energy project has been launched in the disputed Western Sahara region, which is under the control of Morocco. The Janassim project recently launched its measuring campaign ...

Note for old Energy Toolbase users: we created the "ETB Legacy" series of Documents to replicate our default Document/Proposal used on the older version of Energy Toolbase. Depending on which Document(s) you select and how that Document Template was set up, you may be required to specify additional user inputs.

Explore interactive visualizations, unlock patterns, and make informed decisions to maximize yields, protect resources, and drive rural development. Harness the potential of data to ...

California's Demand Side Grid Support (DSGS) Program offers incentives to electric customers that provide load reduction and backup generation to support the state's electrical grid during extreme events from May to October, reducing the risk of rotating power outages. The DSGS Program compensates behind-the-meter sited Energy Storage Systems (ESS) by providing ...

Energy Toolbase is backed by its parent company, Pason Systems, a leading global provider of data management systems and controls automation software for the energy industry. With a global footprint and 40 ...

In November 2021, the governments of the world will meet in Glasgow for the COP26 climate talks. At the same time, Morocco - the occupying power of Western Sahara - is erecting its largest energy project on occupied ...

Customizable types of content: Incentives: rebates, tax credits, and incentives (i.e., Federal MACRS Depreciation) Rates: utility rate/tariff schedules (i.e., SDG& E, AL-TOU) Transactions: financing transactions and cash flows (i.e., PACE Loan) Documents: an output file, used to present a Proposals" analysis (i.e., ETB Legacy - PV only) Note: custom-created Incentives, ...

Learn how to create a web proposal here.. Web Proposals in ETB Developer offer a powerful way for users to enhance their client interactions by creating a unified and organized collection of proposal designs.

Western Sahara Resource Watch has today launched a report detailing how Morocco intends to build over 1000 MW (megawatts) of renewable energy plants in Western Sahara, a territory that Morocco partially occupies.

The energy balance is dominated by biomass energy resources, which is closely associated with environmental degradation in the form of deforestation and soil erosion, a phenomenon likely ...

ETB Sheets is a new Custom Reference Variable input type in Energy Toolbase that can be used in both Transactions and Incentives. This input type has spreadsheet capabilities that allow you to uses reference variables and can ...

A French delegation visiting Morocco with President Emmanuel Macron on Tuesday unveiled investment plans in the disputed Western Sahara as part of a broader suite of agreements and partnerships between the two countries.. Projects in Dakhla and the Guelmim-Oued Noun region are among the 10 billion euros (\$10.8 billion) worth of initiatives announced ...

What is Solar PV Performance? Solar PV performance is a percentage showing how much of the expected solar generation was actually generated by the solar PV system.. How is Solar PV Performance Is Calculated? The actual solar generation is retrieved via the equipment on site.

GOAL: to promote an understanding, on a global scale, of the dynamics of change in energy systems, quantify emissions and their impacts, and accelerate the transition ...

Energy Storage System: Similar to the PV section, the Energy Storage System section includes all the ESS details for your project, including incentive values related to ESS. To add an Energy Storage System, click the green "+" button at the top right of this section. Once storage is added, you can edit the values by clicking on any of the blue ...
